

Specific Causation Reports Due for TVM Injured

Specific Causation Reports are due by the summer for the catastrophically injured women that resulted from the Vaginal Mesh Debacle.

SANTA BARBARA, CA, UNITED STATES, February 23, 2018 /EINPresswire.com/ -- Finally, some good news for catastrophically injured women out of the MDL overseen by Judge Goodwin. ['Specific Causation Reports'](#) are due by the summer for the catastrophically injured women that resulted from the Vaginal Mesh [Debacle](#).

Specific Causation Reports from experts in the field of urogynecology are required to document how the design of the device caused the specific injury alleged by the injured woman.

Transvaginal Mesh Pudendal Neuralgia Opt Out Attorney Greg Vigna, MD, JD, comments, "All of the devices used in POP and all devices used in SUI that pierce the obturator membrane are unreasonably dangerous in that their design allows for a substantial risk of injury to the pudendal nerve and obturator nerve. Injuries to these nerves causes a catastrophic pain syndrome called complex regional pain syndrome (CRPS) also known as reflex sympathetic dystrophy (RSD) that limits any meaningful mobility, and interferes with bladder, bowel, and sexual function."

“

All of the devices used in POP and all devices used in SUI that pierce the obturator membrane are unreasonably dangerous”

Greg Vigna

Specific Causations Reports for the catastrophically injured will include reference to the documented diagnoses of obturator neuralgia, pudendal neuralgia, and CRPS-1 versus CRPS-2 in the medical records of the injured and how the design causes these injuries. Other diagnoses that may be considered by the designated expert is primary versus secondary [myofascial pain](#).

Specific Causation Reports may include comment by the expert on the necessary future care needs of the injured woman as noted in a Life Care Plan. Documented medical and non-medical needs to the life expectancy of the injured woman can be substantial and with most personal injury claims require documentation via a life care plan.

Attorneys across the country are busy preparing clients for individual litigation using expert physicians to produce 'Specific Causation Reports' who can testify to the specific injuries to the nerves of the pelvis caused by pelvic organ prolapse (POP) devices and transobturator slings used for stress urinary incontinence (SUI) that have destroyed the lives of many. Part of that report should include a thoughtful life care plans individually tailored for those injured.
