Teleossco Software Announced as Winner at the 8th edition of Aegis Graham Bell Awards 2017

Teleossco Software announced as winner in "OSS/BSS" category for their innovation "TeleOSS OTT Messaging Gateway" at Aegis Graham Bell Award 2017

NEW DELHI, DELHI, INDIA, February 23, 2018 /EINPresswire.com/ -- NEW DELHI, DELHI, INDIA, February 23, 2018 /EINPresswire.com/ -- New Delhi, 23rd February 2018: Teleossco Software announced as winner in "OSS/BSS" category for their innovation "TeleOSS OTT Messaging Gateway" at Aegis Graham Bell Award 2017, honoring the best innovation in the ICT domain in India. Teleossco Software has applauded as winner at the 8th edition of Aegis Graham Bell Award at NDMC Convention Center, New Delhi.

Aegis Graham Bell has been promoting innovations and entrepreneurship in Telecom, Data Science, Smart City Solution, Cyber Security, Digital India, Cloud and Mobility. AGBA has been rewarding those who made outstanding contribution in these fields since 7 years with a vision to foster and stimulate innovators, for India to become a nucleus of innovations.

TeleOSS OTT Gateway caters to OTT bulk message aggregators, OTT resellers, OTT wholesalers, SMS & OTT marketing agencies, telecom operators and enterprise businesses. With the help of TeleOSS OTT Gateway, a new platform of bulk OTT message marketing can be launched for existing subscriber base without major disruption in the existing network.

"We are delighted that our OTT messaging gateway solution has won the innovative solution award at the prestigious forum of AGBA. The innovation of TeleOSS OTT Gateway has the ability to transform the current mobile marketing segment by leveraging OTT messaging platforms. Winning this prestigious award will not only help us increase mind share among our industry but also help in exploring new territories and generate new employment opportunities. The award will significantly boost the image of TeleOSS as an innovative and leading player in the VAS segment" – Mr Jignesh Parmar, CEO, Teleossco Software

About Teleossco Software Pvt. Ltd

TeleOSS Messaging suite platform includes SMS Gateway software solution, SMS router software, SMS controller software, SMS Hub platform, OTT messaging gateway, Smart City SMS Solution and Business Solutions. The OTT gateway solution has been designed to support scale up to millions of messages at a given point of time. It also has the ability to route the messages through different OTT platforms such as Viber, Line, Skype, WeChat, etc. as defined in the system. TeleOSS has been trusted by more than 50 clients across the globe for large scale OTT volume. Every day millions of OTT messages are sent via TeleOSS OTT Gateway software platforms. We also have long standing channel resellers at various countries and provide support to our partners.

About us

The Aegis Graham Bell Award is one of the largest innovation award for the ICT domain in India. The Aegis School of Business, Data Science, Cyber Security and Telecommunication has established the Aegis Graham Bell Award as a tribute to the father of the telephony, Alexander Graham Bell. This Award is intended to promote innovation, entrepreneurship in the field of Telecom, Social, Mobility, Analytics, Cloud, and Security to provide recognition for outstanding contributions by the innovators. The Award is organized with support of the Cellular Operators Association of India (COAI), and Telecom Centres of Excellence (TCOE), Convergence India and Deloitte as a knowledge partner.
