

Up to 8 Colors and CMYK Custom Printed Balloons Are Now Available at CSA Balloons

The balloon printing giant is now offering an even more precise printing technique by printing in CMYK, with a combination of up to 8 separate inks.

BOUCHERVILLE, QUEBEC, CANADA, February 28, 2018 /EINPresswire.com/ -- Businesses Want Better, More Vibrant Images

And [CSA Balloons](#) is ready to offer the best custom balloon printing options in North-America! The balloon printer is one of the few custom balloon printers that specializes in 8-color printing. Using the base CMYK (cyan, magenta, yellow and black) technique, the 8-color printing process adds 4 additional light colors to the plate. By using 8 color printing, more printed dots are generated, therefore creating a higher resolution and finer images. In other words, this process of adding ink colors, creates vivid, crisp, and life-like images.

Added Accurate Printing for [Custom Logo Balloons](#)

With this advanced printing process, CSA Balloons not only presents the opportunity for enhanced image quality, but also the possibility to match very specific colors that can be difficult to reproduce with less sophisticated techniques. Precise color matching is especially important when reproducing a specific company logo. “We want our customers’ logos to be reproduced flawlessly on balloons. And we’re doing it! Our customers are very pleased with the outcome”, mentions Csaba Laviolette, CSA Balloons President and Founder.
