Tyrosine Protein Kinase CSK

Overview

Tyrosine Protein Kinase CSK (C Src Kinase or Protein Tyrosine Kinase CYL or CSK or EC 2.7.10.2) - Tyrosine-protein kinase CSK also known as C-terminal

Src kinase is an enzyme that, in humans, is encoded by the CSK gene. It plays an important role in the regulation of cell growth, differentiation, migration and immune response.

It phosphorylates tyrosine residues located in the C-terminal tails of Src-family kinases (SFKs). To inhibit SFKs, CSK is recruited to the plasma membrane via binding to transmembrane proteins or adapter proteins located near the plasma membrane. It suppresses signaling by various surface receptors including T-cell receptor (TCR) and B-cell receptor (BCR).
