

# Finally! The Holy Grail of Travel Pillows!

*The only travel pillow to solve the age old problem of head bobbing!*

LOUISVILLE, KY, USA, March 5, 2018 /EINPresswire.com/ -- Finally!! The Holy Grail of Travel Pillows

From time to time most everyone has a need to travel long distances, either by car, plane, bus or occasionally even public transport. Whether you choose to sleep on the journey or not, there is often a need for good head and neck support to take the burden off your shoulders and allow you to sleep or simply relax. No travel pillow offered the solution, until the simple and smart invention known as the nod2.0

Simply put, nod2.0 is the only pillow that stops the age-old issue of head bobbing! Hundreds of shapes and designed pillows all try to combat the issue of forward head motion yet none have succeeded. The pillow cord clips anchor quickly to any seat back allowing passengers of all heights to use and enjoy its relaxing benefits. You also won't find yourself laying over on the stranger next to you.

Choose how you wear your nod, over the eyes, under the chin or across the forehead

nod2.0 was designed by Paula Blankenship, Executive Director of zdoze, LLC who is an avid traveler.

“

It was like a bolt of lightning that hit me. I couldn't wait to get off of the plane to make my prototype.”

*Paula Blankenship,  
Creator/Inventor of nod2.0*

She was often uncomfortable and purchased many travel pillows throughout the years, just to find that after using them, she still suffered from the same issue, head bobbing. On a long-distance flight, she sat out on a mission to solve this problem and tied a scarf around her head on a flight. "It was like a bolt of lightning that hit me," she says. "I couldn't wait to get off of the plane to make my prototype."

After doing her research and securing the intellectual property for the product, a crowdfunding campaign was launched on Kickstarter. The campaign was a major success and raised 1535% over the goal. News of the amazing Holy Grail of travel pillows was heard around the world and major news outlets and television stations carried the story worldwide.

We are now excited to announce we have recently received our inventory of the nod2.0 that is ready for shipping from our Louisville, KY warehouse. Soon you will be seeing the nod2.0 onboard many

airlines and airport retailers around the world.

Thank you,  
Paula Blankenship
