

IntelliBoard to Provide AI Assisted Natural Language Search in Version 5.0

IntelliBoard launching an AI assisted search tool with 5.0 upgrade in spring, 2018; allows a "natural language" search to return desired analytic data results.

MONROE, CT, UNITED STATES, March 13, 2018 /EINPresswire.com/ -- [IntelliBoard](#), Inc. has announced its an AI assisted search, LISA (Learning Intelligence Search Automation), will be available within its 5.0 platform upgrade scheduled for spring, 2018.

IntelliBoard clients have been asking for this tool - the ability to query specific results in a natural way. It's amazing to watch LISA in action - to see the desired data appear instantly."

Dr. Tonya Riney

IntelliBoard users will now be able to query results using a "natural language" search string, e.g., "how many users enrolled this month," "show me failing students," or "users who did not complete." The LISA tool expands as users query - growing more responsive and intelligent as the number of unique queries and results grows.

The LISA tool is part of a broad list of new features for folks using the Moodle LMS: expanded, configurable administrator dashboard; configurable monitors that display reports and analytics based upon your desired data; the Learning Engagement Notifications Area to create notifications on

conditional events; an ad hoc reporting tool; the ability to build and configure dashboards based on specific permissions, and advanced aesthetics/improved interface.

IntelliBoard's VP of Client Services, Dr. Tonya Riney, expressed her enthusiasm for the LISA tool: "IntelliBoard clients have been asking for this tool - the ability to query specific results in a natural way. It's amazing to watch LISA in action - to see the desired data appear instantly. We've previewed the tool with several clients now - and they are clamoring for LISA's official release."

Anatoliy Kochnev, IntelliBoard's CEO, echoes Dr. Riney's excitement, and praises his team: "Our developers are top tier in their respective code languages, responding to the changing needs and demands of our strong client base. Our incredible Client Services team ensures your easy adoption of IntelliBoard, and continuous, ongoing, responsive support."

Using the IntelliBoard tools will bring educational decision makers closer to the metrics that influence how learning is delivered, how learning happens, the tools that facilitate learning, and overall learner performance. Specific tools within IntelliBoard help to highlight high- and low-performing learners, tracking, compliance measurement, competencies, and engagement.

To view a sneak peak of the platform in action, [schedule a demo](#), or view the IntelliBoard website. Further details will be released the first week of March, 2018.
