Medical Test Prep Company, CanadaQBank, Now in 171 Countries

CanadaQBank has successfully created paying customers in 88% of the world!

CANADA, TORONTO, CANADA, March 6, 2018 /EINPresswire.com/ -- CanadaQBank is a revolutionary test preparation program with steadily high proven results. It is hosted online, and has companion applications for iPhone, iPad, and Android devices. The program is used by thousands of doctors and medical students seeking to pass a variety of examinations in the field.

The most recent purchases of this application/website combination have led to the incredible milestone of the product being used in a total of 171 countries. This momentous milestone often unreached by even the most widely recognized businesses, was reached just ten years after launch.

According to recent official statistics, 195 countries are globally recognized as "official." This means CanadaQBank has successfully created paying customers in 88% of the world! The most recent countries to join the growing list include: Gambia, Eritrea, Saba, Gibraltar, and Guinea. If this trend continues, the company can hope to see complete global domination in the next one to two decades.

Students may use this program to study for multiple medical tests. Study questions can be downloaded to the mobile application (available on both iOS and Android), so they may study wherever they go. The current test preparation courses available include:

-MCCEE
-MCCQE, part one
-MCCQE, part two
-USMLE
-AMC MCQ
-PLAB
-SMLE

The secret behind the high number of successfully passing students who utilized this software is the extremely close practice test questions to those found on the real tests. The system is constantly being upgraded to follow the most recent testing patterns, and students can review or analyze their previous tests to see which areas require the most studying.

There are several useful features built into this software. Below is a short but comprehensive listing of these:

-Single click start option takes the hassle out of signing in to the program by utilizing automatic completion of user name and password

-"My questions" and notes sections allow customers to write notes while inside the application, and review them whenever desired

-Study Topic Mode allows students to pick questions pertaining to specific topics they may be having

issue with

-Timed or Tutorial Mode gives freedom to choose preferred way to study, and adds additional difficulty options

-Performance Monitoring, featuring statistical information on progress so users can see how they are improving

-Difficulty level settings include easy, medium, and hard questions. Students have the option to start easy and work their way through the difficulty options.

-Interface is incredibly easy to use with a simple but effective design that takes no time to learn.
