

Trading Made Easy New X PRO Software made History in The Stock Market in February 322 Points!

Trading Made Easy New X PRO Software

LAS VEGAS, NV, UNITED STATES, March 7, 2018 /EINPresswire.com/ -- [Trading Made Easy](#) made History in Market in February with there new X PRO Software

When you see opportunity
you must seize it"— "

James Viscuglia II

I interviewed James Viscuglia II at there office in Las Vegas the founder and designer of the software X PRO and he said, We made in history on stock market our trading group did 322 points! so if you would,ve traded \$500.00 x 322 that,s what you would have made for the month and all of our members in our day trading group at <https://tradingmadeeasy.com> The X PRO price action trading software work way over everybody

standards .the software gives our signals and you have 3 to 5 minutes to get into the trade I made it so simple it,s on a 9th grade level. the software runs 23 hours a day for trading, what makes the in our diffidence then any other trading system is the time line in the trend line and in EMA line and our trading group our people fellow our simple rules for trading and it works out great!! plus our free live trading session that we have on the internet 5 days a week . WE shorted the market last month this is price action trading on the Chicago Stock Exchange.Plus our new X PRO trading software will trading the German DAX market too. I tell everyone to watch it first for free seeing is believing right? and talk to others trading members in our group. The group trades on the E-Mini S&P 500 Future Stock as well as the Eurex Exchange Mini-DAX. Viscuglia's software runs 23 hours a day and notifies the user with a ping when there is a trade. They then have three to five minutes to make the trade if they desire. The proprietary software is based on the Stock Trendline and EMA Stock line but has been reversed-engineered and set at a different timeline. The group does price action trading and earns when the market goes up or down. The group has been very successful finishing each week and month in the positive. The Trading Made Easy X PRO software and rules are easy to understand because they indicated where to enter a trade and when to get out of a trade. You just have to follow the 6 simple indicators and be patient, rather than "hunting" for stocks and trades to take. Once the software is purchased, the user can download it on any computer or mobile device or on multiple devices. Training can last up to a month and the intensive curriculum takes traders from point A to point B. It teaches someone that knows nothing about day trading and gives them access to the more than 50 years of combined knowledge and tips from those in the industry.

Put simply, price action is a technique by which a trader reads the market and then makes a decision based on the actual price movement on the chart, as opposed to by relying on lagging indicators. Most indicators are, in fact, derived from prices on the chart, meaning that they are unnecessary and are reflective of past information.

Price action traders believe that trades should be made on the most important and up-to-date information, which they hold to be the current price and price history of a particular security. Through the use of particular strategies, these traders can utilize past information to learn about what prices

are likely to do in the short term, which gives them a leg up when it comes to eking out short-term profits.

More technically, price action is the movement of a security's price. This action is encompassed in technical and chart pattern analysis in an effort to find order in what might otherwise appear to be a random price movement. Swings, tests of resistance, and consolidation are all examples of price action.

I always believe that people can learn to do the trading on their own if given the proper guidance," says Viscuglia. "Students who take my courses learn how to trade for themselves. After watching and learning, students can make educated risk assessments based on what they've learned. With my software, students can predict trading indicators and show the best chance of profitability. In addition, they will be able to view the lowest possible risks for loss." James said, Cambridge Trading Academy, which will be an educational institute working to equip others to determine for themselves what the right moves are in the trading field. He is also set to live stream a live trading session, which will be accessible via Google, Yahoo, Bing, Facebook and Twitter.

Mr. Viscuglia's aim is to ensure that people have control over their own financial futures. There is everyone from stay-at-home moms to retired law enforcement and military within his group. Coming from his own blue-collar beginnings, Viscuglia is from western New York where he was a machinist and computer programmer. He wanted to ensure that financially he could provide well for his family, which includes four children, after learning about trading from mentors, Viscuglia set out on his own path and created both the software and the Day Trading Group. Look for our new Radio talk show coming on CBS RADIO channels everywhere. <https://www.tradingmadeeasy.com/>
