Bitcoiin B2G as a Payment System

Bitcoiin B2G has built an ecosystem which will dovetail, on Day One, with cryptocurrencies already accepted by major online retailers and services.

Bitcoiin B2G announces the second generation of cryptocurrency. Catch the wave.

HONG KONG, CHINA, March 7, 2018 /EINPresswire.com/ -- Implementing one of the dearest original principles of cryptocurrencies, Bitcoiin B2G has announced a new program of cooperation in payment systems. Bitcoiin B2G, whose ICO is now 81%+ funded (closing to discount pre-ICO purchases on March 30th), has built a system ready to expand, as the number of online retailers and services accepting cryptocurrencies increases.

That increase has been steady. A current list of major online retailers and services currently accepting cryptocurrencies (mostly original bitcoin, at least to date) includes:

> Crypto's primary use right now is as a store of value, but the future is in payment systems."
>
> *Matt Hougan*

• Overstock.com – accepts Ethereum, Litecoin, Dash, Monero and Bitcoin Cash)
• Expedia.com (original bitcoin - hotel bookings only)
• Subway (accepts original bitcoin)
• PayPal (accepts original bitcoin through payment processors, including GoCoin, Coinbase and BitPay)
• eGifter (gift certificate processor)
• Newegg (electronics retailer, only third-party purchases)
• Shopify.com (ecommerce platform for merchants to set up their own online shops)
• Dish Network (dish.com)
• Roadway Moving Company (accepts payments from hotwallets only)
• PizzaforCoins (pizza provider - accepts 45 different cryptocurrencies at last count)
• Intuit PayByCoin (implemented only through their QuickBooks Online electronic invoicing service)
• Microsoft (accepts original bitcoin for any of its games, movies and Windows apps)

(Source / March 2, 2018)

Our program will continue to enroll cooperative retailers and service providers. And our trading platform allows conversion from Bitcoiin B2G to original bitcoin, on a no-fee trade basis.

Thus, Bitcoiin B2G has built an ecosystem which will dovetail, on Day One, with cryptocurrencies already accepted by major online retailers and services. We can only look ahead for this sector of the online payments industry to expand.

As we look forward to the coming days when Bitcoiin B2G can be traded on exchanges, we note that Expedia.com, the travel website, has partnered with Coinbase, a trusted third-party payments processor, to handle the transferring of cryptocurrency funds (so far, just original bitcoin), into U.S. dollars. The mechanism implemented by Coinbase provides an instant exchange feature. Expedia.com has pointed out that this transaction mechanism works in reverse also – so that cancelled reservations and refunds will be processed back to the customer in cryptocoins.

This payment sector can only grow. To the naysayers, who could never imagine cryptocurrencies competing with fiat currencies as a medium of exchange, or in payments/ money transfer transactions, "they're shortsighted and forgetting that "tech increases at an exponential rate," says Matt Hougan, VP/R&D for fund manager Bitwide Asset Management in San Francisco, in Bloomberg. "Crypto's primary use right now is as a store of value," says Hougan. "But the future is in payment systems." Click here to see video.

A Unique Opportunity: Cryptocurrency enthusiasts, depositors and adventurers have seldom had such a chance to participate in the exhilarating launch of an integrated cryptocurrency ecosystem, with built-in controls, strong management and explosive upside growth potential.
