

Aquaculture Market 2018 Share, Trend, Segmentation and Forecast to 2022

PUNE, INDIA, March 8, 2018 /EINPresswire.com/ -- Global Aquaculture Market is estimated at \$160.8 billion in 2015 and is expected to reach \$242.9 billion by 2022 growing at a CAGR of 6.0% during the forecast period. Rising practice of fish farming and rice, which aims at growing yields of rice grains and fishes is likely to open new opportunities for the development of the market in the future. Increasing awareness of physical condition is the major opportunity, whereas unfavourable climatic conditions are hampering the market growth. Aquaculture is presently the highest growing food production system worldwide. It remains a lively and essential production sector for protein food. The increasing prices and convenience of low-priced wild fish has decreased very much and aquaculture has emerged as a good alternative to confine fisheries segment.
