In the technology segment, Jet injectors is expected to hold the largest share, contributing significantly in the market during the forecast period. The jet injector is having the largest market share owing to rising demand for self-administration of drugs that in turn reduces healthcare

expenses as it enables patient receiving treatment in non-medical settings. Further, inhaler technology is growing rapidly in the forecasted period due to rising prevalence of chronic [respiratory](#) diseases such as asthma, chronic obstructive pulmonary diseases (COPD), sleep disorder.

The global needle free drug delivery market by geography is segmented into North America, Europe, APAC, and Rest of the World. The North American region is having the largest market share in the 2017 and expected to dominate the market in 2022. The market share of the region is attributed mainly due to the rising prevalence of chronic respiratory diseases, high awareness among the patients about the novel drug delivery system and increasing number of R&D investments by key market players in this region. The APAC is expected to witness a high growth in the needle-free drug delivery market in the near future due to increasing demand for self-administration such as in case of diabetes, and pain-free delivery of drugs.

Company profiled in the report
