The full report of global lung cancer therapeutics market is available at <http://www.omrglobal.com/industry-reports/lung-cancer-therapeutic>

“The global lung cancer therapeutics market is driven by various pivotal factors which include rising incidence and prevalence rate of cancer, successful clinical trials and FDA clearances to critical lung cancer drugs and surgeries. Other key factors such as government investments, grants and private investment are also boosting the market growth. Significant R&D in lung cancer drugs and a shift towards uses of personalized medicines are creating considerable scope for the market. There is significant growth in the lung cancer drugs market due to the higher number of prescriptions and consumption of lung cancer drugs across the globe.

“

Rise in incidence & prevalence rate of lung cancer & successful clinical trials of lung cancer drugs are driving the market”

OMR Analyst

Global lung cancer by region is segmented on the basis of regions which includes North America, Europe, APAC and RoW. Global lung cancer therapeutics market is expected to perform significantly in North America followed by Europe due to a high prevalence rate of lung cancer market. APAC region is predicted to contribute at a modest rate due to the considerable adoption of personalized drugs and improved healthcare spending.
