Full report of Global Cardiology Surgery, Devices and Drugs Market is available at <https://www.omrglobal.com/industry-reports/cardiology-surgery-devices-drugs-market/>

Factors that are driving the global Cardiology Surgery, Devices and Drugs market are growing incidence of cardiovascular diseases, medical tourism in emerging market, and innovation and development in cardiovascular devices.

Other key factors include availability of remote monitoring solutions and rising healthcare expenditure. Emerging APAC region will be full of opportunity for global Cardiology Surgery, Devices and Drugs market. There are wide variety of new procedures, drugs, and technologies to treat ailments that can affect the health and function of the human heart. One of the most significant advances in cardiac therapies is the use of cardiac [catheters](#) to give clinicians direct cardiac access, or access to the inside of the beating heart, via the vascular system. Innovation in technology is persistent with catheters, new developments including leadless pacemaker deployment, repairing holes in the heart with the aid of biodegradable adhesives and filtering out dangerous blood clots have developed. Although small, catheters are driving medical revolutions that reach into every corner of the human body.

The alternative to catheterization is open-heart intervention, an invasive procedure where the chest is opened to expose and stop the heart while the blood is artificially oxygenated and pumped throughout the body using a cardiopulmonary bypass machine. In addition to the significant post-operative recovery time from an open-chest procedure, CPB has the additional risks of stroke and long-term cognitive deficiencies for the patient. Cardiac catheters are the only clinically available technology that enables beating heart diagnosis and treatment inside the heart without the use of highly invasive open heart surgical techniques. This is popularizing interventional cardiology augmenting the market.

The global Cardiology Surgery, Devices and Drugs market by geography is segmented into North America, Europe, APAC, and Rest of the World. North America is the leading market with highest market share. The market is expected to grow at a CAGR of 6.9%. The pivotal factors contributing in the modest growth includes rise in the incidence and prevalence rate of cardiovascular diseases and technological advancement. The American Heart association in 2011 predicted that by 2030, upwards of 40 percent of the U.S. population that is more than 100 million Americans – would be suffering from some form of cardiovascular disease. However, the benchmark has been reached in 2015. The growing incidence is raising demand for cardiology drugs and devices. In 2015, 41.5 % (102.7 million) of the US population had at least one CVD condition: High Blood Pressure (96.1 million) Coronary Heart Disease (16.8 million), Stroke (7.5 million) Congestive Heart Failure (5.8 million) Atrial fibrillation (5.2 million). In order to overcome cardiovascular diseases, smartphones apps, wearables, health kiosks have been developed in the region. Additionally, robots, nanobots are also FDA approved for use in cardiology procedures. Asia Pacific market is expected to have highest CAGR of 9.5% for the forecasted period of 2018-2023. APAC market is growing due to increasing healthcare expenditure, rising geriatric population and growing market for drug development.

Company profiled in the report

- Pfizer
- Sanofi S.A.
- AstraZeneca
- Novartis
- Bristol-Myers Squibb
- Merck
- Boston Scientific Corp.
- Medtronic
- St. Jude Medical
- Cook Medical
- CR Bard Inc.
- Sun pharma
- GE healthcare
- Johnson and Johnson
- Takeda pharmaceutical company Ltd
- Daiichi Sankyo co. Ltd.
- F. Hoffmann-la Roche Ltd
- Bayer AG
- Boehringer Ingelheim
- Otsuka

The report covers:

- Comprehensive research methodology of Cardiology Surgery, Devices and Drugs market
- In-depth analysis of macro and micro factors influencing the market guided by key recommendations.
- Analysis of regional regulations and other government policies impacting the global Cardiology Surgery, Devices and Drugs market
- Insights about market determinants which are stimulating the global Cardiology Surgery, Devices and Drugs market
- Detailed and extensive market segments with regional distribution of forecasted revenues
- Extensive profiles and recent developments of market players

#### About Orion Market Research

Orion Market Research (OMR) is an Indian research company known for its crisp and concise reports. The company is equipped with an experienced team and young brigade of analysts. The company provides quality syndicated research reports, [customized research reports](#), company profiling, consulting and other research-based services. OMR provide global and regional market reports of various domains such as healthcare, energy, IT, chemicals, and automobiles. The company provides a 360-degree view of the market with parametric analysis, key market insights, key findings, statistical forecasts, competitive landscape, extensive segmentation, key trends, strategic recommendations and detailed company profiles.
