

Global Plasma Therapy Market Research and Forecast, 2018-2023

Plasma therapy market, size, share, market intelligence, company profiles, market trends, strategy, research report, analysis, forecast 2018-2023

INDORE, INDIA, March 12, 2018 /EINPresswire.com/ -- Orion Market Research (OMR), recently published a market research report on global plasma therapy market. According to the OMR analysis, the global plasma therapy market is expected to grow impressively with a CAGR of 13.1% during 2018-2023. Global plasma therapy market has witnessed a significant growth due to rising prevalence of life-threatening diseases which includes various neurological system disorders such as chronic inflammatory demyelinating polyneuropathy (CIPD), idiopathic thrombocytopenic purpura (ITP), multifocal motor neuropathy (MMN). The global plasma therapy market is segmented on the basis of source, application, type, end-user and geography. The report provides detailed and insightful chapters on market overview, key findings, strategic recommendations, market estimations, market determinants, key company analysis, market insights, company profiling, market segmentation, geographical analysis, analyst insights and predictive analysis of the market.

“

Global plasma therapy market is growing significantly due to rising healthcare expenditure and R&D in stem cell platelet-rich plasma (PRP) for cancer treatment.”

OMR Analyst

“The global plasma therapy market is triggered by the significant rise in cases of orthopaedic and neurological diseases and growing medical tourism in emerging countries.”

Moreover, there are other key demographical and macro-economic factors that are helping to boost the growth of

plasma therapy market such as rising global prevalence and the increase in the number of arthritis and orthopaedic patients coupled with cohesive government policies regarding R&D and drug discovery programs. Rising disposable income and purchasing power is another major factor assisting the growth of these expensive therapies. Additionally, the considerable rise in the occurrence of contagious diseases such as hepatitis A&B, tetanus and rabies is estimated to impact the market positively across the globe. Plasma therapy is increasingly adopted for variety of treatments for knee, skin, hair-loss and face treatment across the globe.

On the geographical forefront, North America is the leader having the largest market share in 2017 and is expected to sustain its dominance in the future. This is mainly due to the growing number of arthritis patients, lifestyle-oriented diseases, rising numbers of hospitals, research centres and clinics

which creates significant demand for the plasma therapies. The key driving forces that are expected to boost the market of plasma therapy in North America are rising awareness levels among the [blood donors](#), presence of advanced protein fractioning procedures, and higher per capita income in the region. Healthcare reforms and adoption of Affordable Care Act is expected to support the growth of plasma therapy market.

Furthermore, APAC region is considered to be fastest growing region mainly due to growing medical tourism, technological advancement, rising disposable income of the patients, improving healthcare system, rising number of healthcare practitioners, growing awareness and increasing government initiatives pertaining to the development of plasma protein medicines are expected to fuel the demand of plasma protein products.
