The New York Mesothelioma Victims Center specializes in financial compensation for diagnosed victims of mesothelioma. High-risk work groups for exposure to asbestos in New York include US Navy Veterans, power plant workers, maritime workers, shipyard workers, manufacturing,

or industrial workers, plumbers, welders, electricians, auto mechanics, machinists, miners, railroad workers or construction workers. Typically, the exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's. Navy Veterans make up about one third of all people diagnosed with mesothelioma in the United States each year.

The states indicated with the highest incidence of mesothelioma include Maine, Massachusetts, Connecticut, Maryland, New Jersey, Pennsylvania, Ohio, West Virginia, Virginia, Michigan, Illinois, Minnesota, Louisiana, Washington, and Oregon. However, based on the calls the Mesothelioma Victims Center receives a diagnosed victim of mesothelioma could live in any state including New York. <http://NewYork.MesotheliomaVictimsCenter.Com>

For more information about mesothelioma please refer to the National Institutes of Health's web site related to this rare form of cancer: <https://www.cancer.gov/types/mesothelioma>.
