Major Highlight of the Report

- The engineering industry excludes companies involved in home-building. The market value is calculated as the value of the construction of non-buildings (civil engineering). All currency conversions have been calculated using constant average 2016 annual rate.
- The global civil engineering sector is expected to generate total revenues of \$2,979.0bn in 2017, representing a compound annual growth rate (CAGR) of 6.2% between 2013 and 2017.
- Asia-Pacific is expected to drive the global civil engineering sector contributing a total of 60.3%, followed by Europe with 17.3%.
- Though growth will remain steady, it will register a decelerated rate. Due to economic

conditions, many countries including Germany and France have cut back on spending, which particularly impacts the civil engineering sector.

Civil Engineering Major Outlook

- Save time carrying out entry-level research by identifying the size, growth, major segments, and leading players in the G8 chemicals market
- Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the G8 chemicals market
- Leading company profiles reveal details of key chemicals market players' G8 operations and financial performance
- Add weight to presentations and pitches by understanding the future growth prospects of the G8 chemicals market with five year forecasts
- Compares data from the US, Canada, Germany, France, UK, Italy, Russia and Japan, alongside individual chapters on each country.

Civil Engineering - Competitive Analysis

Key players are making innovative developments in Civil Engineering. The same will help in improving the market performance. Heavy investments are made by major players in the R&D sector
