The global battle ropes market size is expected to reach more than \$492 million by 2023, growing at an impressive CAGR of over 11% during the forecast period.

CHICAGO, IL, UNITED STATES, March 13, 2018 /EINPresswire.com/ -- Arizton's market research report on [battle ropes market](#) offers analysis on market size & forecast, market share, industry trends, growth drivers, and vendor analysis. The market study also includes insights on segmentation by use (indoor and outdoor), by end-user (gym and fitness centers and individuals), by type (<30 feet, 30 feet, 40 feet, 50 feet, and >50 feet), and by geography (North America, APAC, Europe, MEA, and Latin America).

Battle ropes are also referred as heavy ropes or muscle ropes and are gaining wide traction in the health and fitness industry. The extensive use of this fitness equipment that provides whole-body and high-intensity workout with immense control will boost the demand in the global battle ropes market. The adoption of these ropes is primarily driven as it conditions the upper body to replicate the benefits of running and help stimulate the muscles in the abs, back, and glutes. The exercise involved with these are done by incorporating movements, such as jumps, lunges, and squats that form a part of high-intensity circuit training. The use of this equipment for collaborative workouts both indoor and outdoor will boost the adoption of these products in the global market. The increasing focus on wellness and fitness consulting for the body and mind and the growing demand for nutritional supplements, fitness products, beauty and anti-aging products and services will impact this global market positively over the next few years.

“

India, China, and Indonesia to occupy the largest market share in the global market during the forecast period”
Sayan, Sr Analyst
