

Wedge Networks Partners Bangkok Systems To Bring Wedge Absolute Real-time Protection™ To The Royal Thai Army Hospital

Partnership will help defend businesses, governments and consumers against emerging advanced cybersecurity threats

BANGKOK, THAILAND, March 14, 2018 /EINPresswire.com/ -- [Wedge Networks](#), the leader in real-time threat prevention, has been working with its partner, Bangkok Systems, to bring its Wedge Absolute Real-time Protection ([WedgeARP](#)) solution to the Thai market and has recently deployed it in the Royal Thai Army Hospital.

WedgeARP utilizes technologies that incorporate Deep Learning techniques at the network layer to deliver the industry's highest accuracy and performance for real-time, inline detection and blocking of both known and new, previously unknown Ransomware and other malware. WedgeARP also offers a malware analyzer service which further enriches this capability by executing and characterizing suspected malware and then feeding the results back to WedgeARP systems globally to further improve malware prevention speed and accuracy for all customers using the platform.

"Malware prevention is job number one but elevating threat intelligence is also critically important," said James Hamilton, CEO of Wedge Networks, Inc. "Our customers also want to understand the intentions of blocked threats. We are pleased to be working with Bangkok Systems to provide our security solutions where they are greatly needed within the Royal Thai Army Hospital."

Kris Nawani, IT Security Solution Manager, Bangkok Systems & Software Company, said: "BKK Systems partners with market-leading vendors to deliver best of breed technologies that help enterprises solve ongoing advanced network security problems, such as blocking ransomware and zero-days, in their complex IT infrastructures. Wedge Advanced Malware Blocker is a perfect fit into the BKK Systems security solutions portfolio and helps to eradicate advanced malware intrusions as well as provides valuable insights into what is happening within the networks themselves."

About Wedge

Wedge Networks™ is revolutionizing real-time network security with cutting edge innovation, performance, and scale. Embracing global innovation, Wedge's Cloud Network Defense™ (WedgeCND™) and Absolute Real-Time Protection (WedgeARP™) Series of products integrate and orchestrate the industry's highest performance security inspection and mediation engines with best-in-class security technologies developed by Wedge and third parties. Purpose-built as fully virtualized security systems, these products can be deployed in the form of x86 appliances, virtual machines, or cloud application software. Today, these industry-leading solutions block security threats for tens of

millions of end users in enterprise, service provider, government agency, and security-as-a-service networks spanning more than 17 countries.

Wedge Networks is headquartered in Calgary, Canada with international offices in Dallas, USA; and Manama, Bahrain. Visit <http://www.wedgenetworks.com/> for more information
