

Global Protein Labeling Market Research and Forecast, 2018-2023

Protein Labelling Market, Size, Share, Market Intelligence, Company Profiles, Market Trends, Strategy, Analysis, Forecast 2018-2023

INDORE, INDIA, March 14, 2018 /EINPresswire.com/ -- Orion Market Research ([OMR](#)), recently published a market research report on Global Protein Labelling Market. According to the OMR analysis, the Global Protein Labelling Market is expected to grow impressively with a CAGR of 13.3% during 2018-2023. The Global Protein Labelling market is segmented on the basis of labelling method, product, application and geography. The report provides detailed and insightful chapters on market overview, key findings, strategic recommendations, market estimations, market determinants, sector analysis, key company analysis, market insights, company profiling, market segmentation, geographical analysis, analyst insights and predictive analysis of the market.

The full report of Global protein labelling is available at www.omrglobal.com/industry-reports/protein-labeling-market/

“Exploration through R&D is expected to improve protein tagging technology and enhance higher resolution microscopy. The adoption of IT automation has eased the research and development and expected to boost experimentation and research. Technological advancement and innovation in Global Protein labelling markets such as computer-controlled systems for fluorescence and laser-confocal microscopy are creating scope for the market.”

“

“Global initiatives in proteomics research fueling growth of protein labelling market”.

OMR Analyst

The emergence of post-translational modification monitoring is contributing towards the growth of the market. Enzymatic modification of proteins after protein synthesis is referred to as the process of post-translational modification (PTM). Monitoring these chemical alterations is revealing greater insights into real-time functioning in the human body and is unlocking newer disease mechanisms. Collaborations between research and academic institutions globally are creating efforts to understand and fine-tune proteomics research by studying proteins in greater detail through the exchange of knowledge and molecular biology techniques. North America generates highest revenues across the globe due to ongoing projects on gene expression control, protein-protein interaction, in-vivo quantitative proteomics and so on. The significant rise in research projects in Universities, research centers, clinics and hospitals triggered the demand for protein labelling products and methods. Apart from R&D projects, rise in lifestyle-oriented diseases,

development in proteomics & genomics and so forth are driving market growth.

Companies Profiled

- G-Biosciences
- GE Healthcare (Amersham)
- General Electric Company
- Kaneka Corporation
- Randox Laboratories
- Thermo Fisher Scientific, Inc.
- Velp Scientifica
- Horiba Medical
- Innova Biosciences
- Kierkegaard & Perry Laboratories
- PerkinElmer, Inc.
- Agilent Technologies
- Bruker
- Chemical Computing Group, Inc.
- Gerhardt Analytical Systems
- Hoffman-La Roche Ag
- Hycel GmbH
- Li-Cor, Inc.
- Malvern Panalytical
- Merck & Co., Inc.
- New England Biolabs
- Promega Corporation
- Sera care Life Sciences, Inc.

The report covers:

- Comprehensive research methodology of Global protein labelling market.
- In-depth analysis of macro and micro factors influencing the market guided by key recommendations.
- Analysis of regional regulations and other government policies impacting the global protein labelling market.
- Insights about market determinants which are stimulating the protein labelling market.
- Detailed and extensive market segments with regional distribution of forecasted revenues.
- Extensive profiles and recent developments of market players.

About Orion Market Research

Orion Market Research (OMR) is an Indian research company known for its crisp and concise reports. The company is equipped with an experienced team and young brigade of analysts. The company provides quality syndicated research reports, [customized research reports](#), Company Profiling, [consulting](#) and other research-based services. OMR provides global and regional market reports of various domains such as healthcare, energy, IT, chemicals, and automobiles. OMR provides a 360-degree view of the market with parametric analysis, key market insights, key findings, statistical forecasts, competitive landscape, extensive segmentation, key trends, strategic recommendations and detailed company profiles.
