

# Global Respiratory Drugs and Devices Market Research and Forecast, 2018-2023

*Global Respiratory Drugs and Devices Market, Size, Share, Market Intelligence, Company Profiles, Market Trends, Strategy, Analysis, Forecast 2018-2023*

INDORE, INDIA, March 14, 2018 /EINPresswire.com/ -- Orion Market Research (OMR), recently published a market research report on the Global respiratory drugs and devices market. According to the OMR analysis, the Global respiratory drugs and devices market is expected to grow at a CAGR of 7% during 2018-2023. The global respiratory drugs and devices market has witnessed a significant growth due to increasing prevalence of chronic respiratory diseases across the globe. The global respiratory drugs and devices market is segmented on the basis products, respiratory drugs, end users, and geography. The report provides detailed and insightful chapters on market overview, key findings, strategic recommendations, market estimations, market determinants, sector analysis, key company analysis, market insights, company profiling, market segmentation, geographical analysis, analyst insights and predictive analysis of the market.

The full report of Global Respiratory Drugs and Devices Market is available at <https://www.omrglobal.com/industry-reports/respiratory-drugs-devices-market/>

“

High prevalence of the chronic respiratory disease such as asthma is the major driver for the growth of respiratory drugs and devices market.”

*OMR Analyst*

“The Global Respiratory Drugs and Devices Market has been motivated by the increasing prevalence of chronic respiratory diseases globally. Asthma is a chronic lung disease that narrows the airways. Both children and adults are affected by asthma. It is estimated that 300 million people of all ages are affected by asthma and 250,000 die due to asthma. Another major respiratory problem is the chronic obstructive pulmonary diseases (COPD). It is the 4th leading cause of death in US. Approximately, 142,000 people died of COPD in 2014 and almost the same number of people died of lung

cancer in the same year. This increasing prevalence of chronic respiratory disease has resulted in higher diagnosis rate and prescription of respiratory drugs.”

The market on the basis of geography is divided among four major regions – North America, APAC, Europe, and Rest of the world. North America is the leading market. The market is expected to grow at a stable CAGR. North American market is driven by high sales of branded drugs and a high number of patient diagnosed and treated for respiratory diseases. North American market is followed by Europe, Asia Pacific and Rest of the world. Asia Pacific market is expected to have highest CAGR

amongst all regions for the forecasted period of 2018-2023. APAC market is driven by growing aging population with respiratory disorders. Furthermore, pollution and lifestyle changes are driving the APAC market.

The report provides detailed & insightful chapters which include market overview, key findings, strategic recommendations, market estimations, patent analysis, pipeline analysis, market determinants, key company analysis, company profiling, market segmentation, geographical analysis, analyst insights and predictive analysis of the market.”
