“

Growing incidence and prevalence rate of diabetes will drive the global market.”

OMR Analyst

Global diabetes market has been driven by the increasing prevalence of diabetes across the globe. According to WHO, the number of people with diabetes has increased from 108 million in 1980 to 422 million in 2014. The US alone spends 11% of its health expenditure on diabetes. India and China are the most affected economies with over 120 million patients suffering from diabetes. A majority of diabetes

patients are either undiagnosed or lack the basic treatment. The impending unmet needs are forcing the companies and governments to provide basic needs for diabetes. R&D exploration will continue the growing trend in the diabetes market.

The global diabetes market on the basis of type is segmented as type1 diabetes, type2 diabetes, and gestational diabetes. Among these, type-1 diabetes is expected to hold the largest share. On the basis of drug class, the market is further bifurcated as alpha-glucosidase inhibitors, amylin analogs, antidiabetic combinations, dipeptidyl peptidase 4 inhibitors, incretin mimetics, insulin, meglitinides, non-sulfonylureas, SGLT-2 inhibitors, sulfonylureas, and thiazolidinedione. Moreover, on the basis of devices the market has been divided into blood glucose meters, blood glucose strips, [insulin injection pens](#), insulin syringes, continuous glucose monitoring systems, [insulin pumps](#), and lancets.

Geographically, the market is divided among four major regions – North America, Asia-Pacific (APAC), Europe, and Row (Rest of the world). North America is the leading geography followed by Europe and the Asia Pacific. The Asia Pacific has been expected to have the highest growth rate amongst the regions. The North American market has been driven by the high awareness, availability of reimbursements and high expenditure on healthcare. Asia Pacific market is driven by a high population of diabetic patients.
