

Voice presentation Global Market 2018: Key Players Alibaba, Amazon, IBM, Microsoft

Voice presentation Market 2018 Global Industry Analysis, Opportunities and Forecast To 2022

PUNE , INDIA, March 15, 2018 /EINPresswire.com/ -- Summary

Yesterday, our core interface with the digital world was a keyboard and mouse. Today it is a touchscreen. Tomorrow it will be voice commands. Just as iOS and Android run our lives now, so voice platforms will run our lives in the next decade.

Those companies who master voice - and related AI technologies such as machine learning, augmented reality and gesture control - could become some of the most valuable companies in the world.

In this report we look into trends, value chain, investment timeline and the major players in [voice presentation](#).

Oracle
Qualcomm
Samsung Electronics
SAP
Softbank
Sony

Splunk
STMicroelectronics
Tencent
Xilinx

Scope

- This report is part of our ecosystem of thematic investment research reports, supported by our “thematic engine”.
- About our Thematic Research Ecosystem
- Research has developed a unique thematic methodology for valuing technology, media and telecom companies based on their relative strength in the big investment themes that are impacting their industry. Whilst most investment research is underpinned by backwards looking company valuation models, thematic methodology identifies which companies are best placed to succeed in a future filled with multiple disruptive threats. To do this, tracks the performance of the top 600 technology, media and telecom stocks against the 50 most important themes driving their earnings, generating 30,000 thematic scores. The algorithms in “thematic engine” help to clearly identify the winners and losers within the TMT sector. Our 600 TMT stocks are categorised into 18 sectors. Each sector scorecard has a thematic screen, a risk screen and a valuation screen. Our thematic research ecosystem has a three-tiered reporting structure: single theme, multi-theme and sector scorecard. This report is a Single Theme report, offering in-depth research into a specific theme. It identifies winners and losers based on technology leadership, market position and other factors.

Reasons to buy

- Our thematic investment research product, supported by our thematic engine, is aimed at senior (C-Suite) executives in the corporate world as well as institutional investors.
- Corporations: Helps CEOs in all industries understand the disruptive threats to their competitive landscape
- Investors: Helps fund managers focus their time on the most interesting investment opportunities in global TMT.
- Our unique differentiator, compared to all our rival thematic research houses, is that our thematic engine has a proven track record of predicting winners and losers.
