Ireland has been leading the international real estate game for a significant period now. It is a constant debate whether Ireland has reached its peak for optimum returns or that the realty market will soar to render more results for investors. All arguments though do conclude that Ireland is one of the world's top 10 cities for real estate investment, as also mentioned in the 2017 Jones Lang LaSalle's Investment Intensity Index. This has given rise to a host of #PropTech, or Property Tech, startups that deal with property and real estate innovatively, in Ireland.
