

# Arecont Vision Enhances A&E and Consultant Program with Updated Tools

*Arecont Vision steps up support for architects, engineers, and consultants with new tools and enhanced resources, including Revit*

LOS ANGELES, CALIFORNIA, UNITED STATES, March 19, 2018 /EINPresswire.com/ -- [Arecont Vision®](#), the industry leader in IP-based megapixel camera technology, has announced enhancements to the [Arecont Vision A&E Partner Program](#) it provides for industry professionals.

This is a very useful resource for our A&E Partner Program members, and Arecont Vision will continue to add and update available tools and support materials going forward.”

*Laura Freeny, Senior Manager, Strategic Accounts, Arecont Vision*

The A&E Partner Program supports industry architects, engineers, and consultants with the necessary tools and resources to more effectively deliver valuable project specifications and system designs that include Arecont Vision-brand megapixel cameras. Participants have access to a dedicated A&E Partner Program Portal which provides design resources including product specification documents, mechanical drawings, and calculators. Revit® has now been added to the available resources.

Revit is a BIM (Building Information Modeling) software package developed by Autodesk that produces intelligent three-dimensional models. BIM allows architects, consultants, and engineers to collaboratively design facilities through software. Each Arecont Vision Revit family includes the camera’s geometry, lens and mounting options, field-of-view coverage shapes, specifications, and ordering information. The new Revit models are available for download from Arecont Vision through the A&E Partner Portal.

“BIM models enhance the security designer’s ability to articulate megapixel camera technology to their clients before the system is installed or the facility is even built,” stated Laura Freeny, Senior Manager, Strategic Accounts, Arecont Vision. “This is a very useful resource for our A&E Partner Program members, and Arecont Vision will continue to add and update available tools and support materials going forward.”

## SUPPORTED AV CAMERA MODELS

Revit models are now available for the following single-sensor Arecont Vision-brand megapixel camera series.

- MegaView® 2
- MegaDome® 2
- MegaDome 4K
- MicroDome G2
- MicroBullet®

MegaVideo® G5  
MegaVideo 4K  
MegaVideo Flex

Arecont Vision-brand multi-sensor megapixel camera series are also supported:

MicroDome Duo  
SurroundVideo® Omni G2  
SurroundVideo Omni G3  
SurroundVideo G5  
SurroundVideo G5 Mini

Membership in the A&E Partner Program is free of charge for industry architects, engineers, and consultants.
