

# Allyus.Org Partners with Civic Technologies for Login Services

*Secure identity service for a voting platform aiming to improve democracy*

NEW YORK, NY, USA, March 19, 2018 /EINPresswire.com/ -- Allyus.Org - a political social network which enables citizens to be more involved in government policy decisions - today announced a strategic partnership with Civic Technologies Inc., the company revolutionizing digital identity with its Blockchain-based technology. The partnership brings trusted, secure identity services to the Social Networking industry and enables Allyus.Org to utilize this tech to provide a secure login on a social network.

“The Civic Partnership is a first step in preventing fake profiles from impacting modern democracies and providing a secure online voting system that can have real impact on policy”

“We are pleased to welcome Allyus.Org to Civic’s Partner Network. This collaboration marks another milestone for Civic’s ecosystem and for on-demand, secure, and low-cost access to identity verification services,” said Civic CEO, Vinny Lingham.

Civic will help enable secure sign-on and login across the Allyus platform. This will help prevent users from creating fake profiles and help to validate the information being discussed on the site in a time when foreign nations actively attempt to influence domestic policies.

## About Allyus

Allyus.org is a location based political social network which empowers citizens to be more involved in government policy decisions.

It offers a unique take on polling and news which allows people to see through the rhetoric and delve directly into the data. This helps identify fake news and propaganda through features that promote critical analysis and independent thought.

## About Civic

Civic is a visionary blockchain identity-verification technology that allows consumers to authorize the use of their identities in real time. They are spearheading the development of an ecosystem that is designed to facilitate on-demand, secure, and low-cost access to identity-verification services via the blockchain. Civic recently introduced a Civic token that participants in the ecosystem will use to provide and receive identity-verification-related services. The company sold \$33 million of its tokens

during its token sale event in June 2017. For more information, visit <https://www.civic.com>.
