# Alpega and Gatehouse Logistics Partner to Provide Live Vehicle Tracking to Transwide and Teleroute Customers

Transwide and Teleroute users will have live vehicle visibility and additional services such as geo fencing and "corridoring" on strategic shipments

ZAVENTEM AND NøRRESUNDBY, BELGIUM AND DENMARK, March 20, 2018 /EINPresswire.com/ -- Logistics software company Alpega and supply chain data aggregator and unifier GateHouse Logistics today jointly announce a strategic partnership to provide Transwide and Teleroute customers with live vehicle visibility and tracking and additional services for strategic shipments.

Over the last months, the two companies have developed and tested a comprehensive interface between their platforms. With the technical integration of the two platforms completed, Transwide customers can now request live vehicle tracking for monitoring transport execution to carriers whose telematics system is connected to GateHouse Logistics' secure data sharing service - ghTrack®. The process is simple and activation seamless.

By developing the interface, Transwide and Teleroute users will have live vehicle visibility and additional services, such as geo fencing and "corridoring" on strategic shipments with minimal impact on the operations of carriers.

Jesper Bennike, CEO of Gatehouse Logistics

Shippers will be able to request live vehicle tracking from their carriers, which carriers can activate

> The Transwide platform perfectly integrates with our ghTrack data distribution service and delivers increased value to Alpega's customers"

upon request on a per truck basis via the ghTrack service. Once a transport load starts, the onboard unit data automatically feeds Transwide software and provides the shipper with total visibility on transport execution.

With more than 400 hundred different telematics systems connected to ghTrack, the service will have coverage of thousands of trucks making it one of the most comprehensive track and trace solutions in the supply chain.

"Alpega is a very focused partner whose strategy of providing real-time transport execution software fits perfectly with

GateHouse Logistics' mission of providing secure live vehicle information," says Jesper Bennike, CEO of Gatehouse Logistics. "The Transwide platform perfectly integrates with our ghTrack data distribution service and delivers increased value to Alpega's customers."

"Visibility of transport execution is paramount for our customers and integration with ghTrack makes it easier for carriers to provide their customers with live information without disrupting any processes," adds Fabrice Maquignon, CEO Transwide and Teleroute (ALPEGA Group). "The interface is now available to Transwide customers and will be available to Teleroute users in the coming weeks."

About GateHouse Logistics A/S
GateHouse Logistics A/S is a completely neutral telematics data intermediator. We champion data sovereignty and are leading the way that data is securely shared across the entire supply chain bringing with it much-needed transparency of inbound and outbound logistics. Our ghTrack® data sharing service transforms data from all diverse telematics systems into one unified and logical data stream that can be easily integrated into any business system. Users of ghTrack are the world's leading transport companies, automotive, e-commerce and retail/wholesale companies and manufacturers. Partners are solution providers who build their own solution on top of the unified data stream. Visit www.gatehouselogistics.com

About the Alpega Group
The Alpega Group is a leading global logistics software company that offers end to end solutions that cover all transport needs, including Transport Management Services (TMS) and Freight Exchanges.

The TMS software solutions, inet, Transwide and TAS-tms, and transport procurement software specialist TenderEasy connect companies to a broad network of logistics providers and digitize their complex supply chain management. The TMS systems provide live visibility over incoming and outgoing logistics and seamlessly link truck drivers and logistics providers with shippers. The three freight exchanges known as Teleroute, Bursa and 123cargo serve as marketplaces for matching spot shipments and capacities.

Our +200,000 user community is electronically connected every day to successfully manage critical transport processes. All our solutions allow our customers and their partners to interact electronically. They can be additionally combined to deliver more value to our customers and theirs.
