

# Build Web Apps with no-compromise UI - regardless of device [with Isomorphic Software's Release 12]

*Isomorphic Software – provider of the most advanced platform for building progressive web apps - delivers features offering no-compromise UI for any device.*

SAN FRANCISCO, CA, UNITED STATES, March 21, 2018

/EINPresswire.com/ -- To stay ahead of the competition, businesses have to continually optimize and innovate. This generates a never ending list of new web applications to be built by IT. And, as each application is delivered, it is quickly followed by a slew of enhancement requests. The todo list is never ending. IT obviously focuses on the most pressing requirements first, sometimes only getting to the critical aspects of solutions. Things like incorporating UI branding, and building native apps for smartphones and tablets are highly desired but sadly often neglected.

**Build Better Web Applications. Faster.**

**12**  
SmartClient  
Smart GWT

 Fastest Dev of High Quality, High Performance Web Apps

 Most Productive End-users

 No Compromise UI - Regardless of Device

Dynamic properties | SASS templates | Microsoft surface/mixed input support | Show/hide icons on focus | Highlighting pending values | Frozen columns with vertical autosizing | Obsidian skin | Stratus skin | WebSockets Support in RTM | Tree picklists for SelectItem | TypeScript support | Selenium 3.0 support

 Isomorphic™  
SOFTWARE

Release 12 from Isomorphic is coming soon

The [SmartClient platform](#) from [Isomorphic Software](#) enables developers to very quickly build high-productivity web applications. What's more, applications can be built once for the desktop, and automatically adapt for any device (smartphone, tablet, etc.) without necessitating that developers write any device specific code. SmartClient is the most mature, most complete solution available:

- The broadest, deepest set of device-aware Enterprise grade UI components
- Built in mobile adaption that allows you to code once for all devices
- Intelligent Data Management for unprecedented scalability and responsiveness

“

Release 12 makes it easy for developers to deliver no-compromise UI - regardless of the device used to access the web application.”

*Charles Kendrick, CTO of Isomorphic Software*

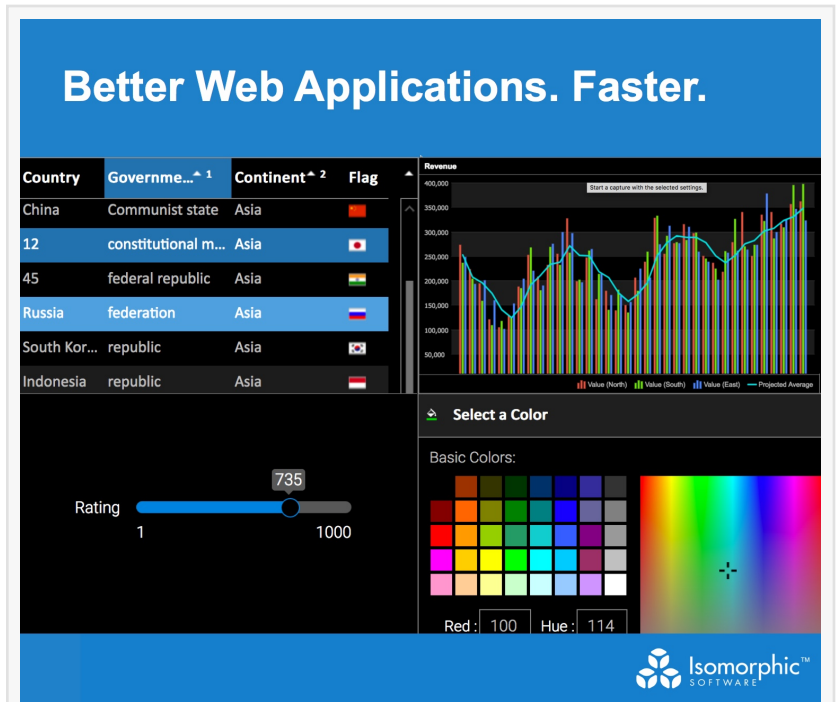

With Isomorphic's [Release 12](#) - to be released this month - Isomorphic Software takes a huge leap forward. One particular focus - according to Isomorphic CTO, Charles Kendrick was to "make it easy for developers to deliver no-compromise UI - regardless of the device used to access the web application." To this end, Release 12 incorporates two new contemporary skins (Obsidian' and Stratus'), SASS support for modifying skins, and Microsoft Surface support. This alone should allow IT to finally get some well earned rest.

Release 12 also includes a host of new capabilities to 1) facilitate the fastest development of high-quality, high-performance web applications, and 2) to make end-users more productive. The feature list therefore incorporates: Dynamic properties | SASS templates | Microsoft surface/mixed input support | Show/hide icons on focus | Highlighting pending values | Frozen columns with vertical autosizing | Obsidian skin | Stratus skin | WebSockets Support in RTM | Tree picklists for SelectListItem | TypeScript support | Selenium 3.0 support
