

Ancon Announces New Distributor for Japan

ANCON is pleased to announce a new partnership with highly regarded meteorological and environmental instrumentation distributor, EKO Instruments in Japan.

CANTERBURY, KENT, UNITED KINGDOM, March 21, 2018 /EINPresswire.com/ -- [ANCON Technologies Ltd](#) is pleased to announce an exciting new partnership with the highly regarded and well renowned meteorological and environmental instrumentation distributor, [EKO Instruments](#).

The agreement includes distribution of ANCON's unique nanoparticle research product line within the region of Japan and will stabilise and strengthen the company's growing presence in the area.

Air Pollution

EKO will join ANCON's growing list of partners responsible for regional distribution of the aerosol science product line including the Aero Select; the unique portable wide-range aerosol sampler, and the Aerosoliser; offering controlled powder particle dispersal.

“

We are delighted to be partnering with EKO for the distribution of our aerosol research instrumentation range and planned future products in Japan.”

*Wesley Baker - Director of
ANCON Technologies*

Commenting on the agreement, [Wesley Baker](#), ANCON Technologies Development Director said "We are delighted to be partnering with EKO for the distribution of our aerosol research instrumentation range and planned future products. We are set to increase our presence in the aerosol science market with the planned launch of further products during 2018. EKO is a great addition to our team, ensuring that we now have agreements with a strong mix of both specialist and

broad-line distributors."

Baker adds "EKO is a well-established, progressive and innovative distributor with over 90 years' experience, now concentrating on remote sensing, evaluation and measurement of photovoltaic performance, and radiation and spectral measurements. We look forward to working closely with the team for a successful future."
