

One Solution For ALL launching a new Medical and Dental website design website

A brand new way to get all your Medical and Dental website needs in one place to revolutionize your patient experience

DALLAS, TX, USA, March 21, 2018
/EINPresswire.com/ -- One Solution For ALL launching a website (<https://www.onesolutionforall.com>) to cater for all the Medical and Dentists website that truly revolutionize the patient experience.

The Website will provide all the following services and much more

- a) Responsive Website Design
- b) Online Appointment Scheduling
- c) Website Reviews
- d) Business Emails
- e) Social Media Optimization
- f) Search Engine Optimization
- g) Call Tracking
- h) Website Blog

You can [test the various features](#) on the website itself like scheduling appointments online, patient reviews, Blogs.

[Scheduling Appointment Made Easy](#)

Patients can select the time and date, the doctor they want to schedule with, fill in the required information like insurance, zip codes and submit. The Doctor clinic gets an email and they can click a Confirm button and the patient gets an email saying the appointment is confirmed. You can test it yourself how exactly it works.

Patients can self schedule 24x7, any time, any where. You can add any number of Doctors with a picture to get a personalized experience for the patients.

[Patients can write reviews](#) on website

Patients can write reviews on the website itself. We can help Clinics send the patients Review links via Email or Texts to get their feedback. This helps in increasing traffic to the website and also getting reviews in Google Searches.

Once the Review Page gets indexed it starts showing up in Google searches just like any other Google review.

The number of Patients who read and trust online reviews is increasing. According to a recent survey, 88 percent of consumers trust online reviews as much as a personal recommendation—which is astounding, considering most online reviews are posted by total strangers. The same survey found that only 12 percent of the population did not regularly read reviews for consumer products. So having good patient reviews online is one of the most important factors for patients choice for Doctors.

What this means is that not offering user reviews (or ignoring them as a potential marketing opportunity) is similar to alienating 88 percent of your possible patients, depriving them of information they want to help them choose you as their doctor.

The importance of SEO(Search engine optimization) was never more than what it is right now.

SEO is always evolving, a moving target and that means your online business strategy must keep evolving, too. You have to keep pace with the online marketing trends or else you will lag behind and miss potential clients. We are Google AdWords Search Certified.
