

DNotes Global, Inc. Announces Release of DNotes White Paper

DNotes Global, Inc. today announced the release of the DNotes white paper, which provides a comprehensive examination of the digital currency's purpose

WEST CHICAGO, IL, UNITED STATES, March 22, 2018 /EINPresswire.com/ -- DNotes Global, Inc. today announced the release of the DNotes white paper, which provides a comprehensive examination of the digital currency's purpose, objectives, and strategy. According to a company spokesman, the white paper's release is an important part of the company's accelerated effort to promote and advance DNotes' vision of achieving widespread acceptance and adoption on a global scale.

The DNotes white paper is as unique as the DNotes digital currency. Unlike many other digital currency white papers, the one presented by DNotes Global, Inc. focuses less attention on the technology behind the currency and more on how the company intends to achieve the elusive goal of bringing digital currency into the mainstream economy by facilitating mass adoption.

That uniqueness should come as no surprise to those familiar with the now-four-year-old DNotes project. As company CEO Alan Yong notes, "From its inception, DNotes has always been a different type of project. Unlike most digital currencies with a tendency to follow others by being involved in just one or two things, the DNotes team has always been committed to ensuring that the DNotes cryptocurrency would be best in class in every area that matters. Four years later, that commitment remains as strong as it has ever been"

The document's presentation focuses on simple, understandable explanations, using real world examples and informative graphics to make its case. The result is a white paper that offers not only a look at the coin's technological benefits, but an explanation of the DNotes Global, Inc strategic plan as well.

Throughout the white paper, readers will discover an in-depth examination of the company's inner thought processes and receive an introduction to the holistic approach that Yong and his team are applying in their efforts to achieve mass adoption for the DNotes digital currency.

That approach is unique as well. DNotes Global, Inc. is working to expand the DNotes Decentralized network, a developed ecosystem that integrates the network, business and technology consulting, and NextGenVC into one cohesive, unified business enterprise. DNotes' holistic approach to developing this ecosystem is patterned after the successful business principles promoted by co-founder Yong.

"As a for-profit company," Yong wrote in his introduction to the white paper, "DNotes Global, Inc.'s core mission is to provide the leadership and management to protect and promote the best interest of the currency. DNotes Global is focused on bringing the DNotes digital currency into the mainstream, with a platform and ecosystem that will give it real intrinsic value like cash."

As the white paper makes clear, DNotes is a "big bold vision of global scale: to create a truly inclusive supplemental currency that is accessible to everyone in the world." According to Yong, however, the achievement of that goal is not something that can just be left to chance. He

suggested that it is also not something that can be accomplished on a limited scale.

“Realistically, mass acceptance of digital currency cannot be achieved in isolation, on a small scale, with inadequate funding, an unsettled vision, and wrong timing,” he declared. “Arnold H. Glasow said it best when he said, ‘Success is simple. Do what’s right, the right way, at the right time.’ DNotes is guided by these simple principles and insights from my book, “Improve Your Odds: The Four Principles of Business Success.”

About DNotes and Alan Yong:

DNotes co-founder Alan Yong is a well-regarded visionary who established Dauphin Technology in 1988. He is the author of the book “Improve Your Odds: The Four Pillars of Business Success, and is well-regarded as a “thought leader” in the cryptocurrency industry.

DNotes is a digital currency noted for its consistent and reliable growth, and innovative initiatives that actively engage women, young people, small businesses, workers, and others – effectively inviting the world to participate in the digital currency revolution.
