About Flagship LMS

Flagship LMS was founded on the belief that a learning management system is more than just a place to park workplace compliance SCOs. An LMS is an enterprise tool which can help organizations cut costs and increase efficiency and morale by providing a pathway for junior employees to progress in responsibility, and eventually assume senior leadership roles. Flagship LMS facilitates this training journey by combining a robust, versatile LMS with Intelliboard analytics and comprehensive customer support that goes beyond just teaching administrators which settings to turn on. Our staff specializes in helping organizations answer the questions, "Where do we want to be in five years?" and "How can we chart a course to get there?"
