

# Global Robotics Vol III - Market by Technology, Development, Trends and Growth Opportunities 2017- 2022

PUNE, INDIA, March 23, 2018 /EINPresswire.com/ -- WiseGuyReports.com with their unique quality of simplifying the market research study, presents a deep diving study report "Robotics Vol III - Global Thematic Research"

Robotics Vol III

Overview:

Until Cloud computing technology was developed, robots were stand-alone, fixed-function pieces of electro-mechanical equipment with capabilities that were limited to the hardware and software on board. But by becoming networked devices constantly connected to the Cloud, robots can now leverage the experience of every other robot of their kind, learning at an accelerating rate. A range of artificial intelligence (AI) technologies is set to make them increasingly sentient, versatile, mobile and autonomous.

Major Scope of the Report:

Thematic Research Ecosystem has developed a unique thematic methodology for valuing technology, media and telecom companies based on their relative strength in the big investment themes that are impacting their industry. Whilst most investment research is underpinned by backwards looking company valuation models, thematic methodology identifies which companies are best placed to succeed in a future filled with multiple disruptive threats.

To do this, tracks the performance of the top 600 technology, media and telecom stocks against the

50 most important themes driving their earnings, generating 30,000 thematic scores. The algorithms in “thematic engine” help to clearly identify the winners and losers within the TMT sector. Our 600 TMT stocks are categorised into 18 sectors. Each sector scorecard has a thematic screen, a risk screen and a valuation screen.

Thematic research ecosystem has a three-tiered reporting structure: single theme, multi-theme and sector scorecard. This report is a Multi-Theme report, covering all stocks, all sectors and all themes, giving readers a strong sense of how everything fits together and how conflicting themes might interact with one another.
