

TRU Aseptics Obtains Grade 'A' Dairy License

TRU Aseptics announced today that it has been approved as a Grade "A" Dairy Manufacturer and Interstate Milk Shipper.

BELOIT, WI, UNITED STATES, March 26, 2018 /EINPresswire.com/ -- TRU [Aseptics](#) ("TRU"), a low-acid [aseptic](#) processor, announced today that it has successfully passed its State of Wisconsin [Dairy](#) Inspection and has been approved as a Grade "A" Dairy Manufacturer and Interstate Milk Shipper. The Wisconsin Dairy Inspection program follows rigorous State of Wisconsin requirements and complies with the Food and Drug Administration guidelines. The dairy accreditations ensure the safety of milk and allow interstate commerce.

TRU is a pure-play fluid aseptic processor and contract manufacturer of low acid products that will now include Grade "A" Dairy - 2% milk, skim, whole milk and half & half. TRU can receive and process raw, pasteurized and standardized milk in tankers and totes. In anticipation of dairy production, TRU invested in state-of-the-art equipment, including an SPX Flow APV/Gaulin Aseptic homogenizer. The new aseptic homogenizer delivers the latest technologies for dairy applications. Its variable speeds and robust functionality will provide processing options for both dairy and plant-based dairy alternatives. Homogenization is critical for stabilization, as well as overall consistency and quality of dairy products.

"We are pleased to have passed the State of Wisconsin dairy inspection and plan to begin production of low-acid dairy products this month," said James Hurley, CEO of TRU Aseptics. "We found that there were significant unmet needs in the marketplace for dairy-based aseptic products and the acquisition of a dairy license was the next logical step to fill unmet needs for our clients."

TRU's Beloit location is geographically ideal for dairy production. TRU is in the Upper Midwest Zone 30 of the Federal Milk Marketing Order. The proximity to many Midwest dairies and centralized location will offer many advantages to customers, including extensive sourcing options of dairy.

About TRU Aseptics-TRU Aseptics is a privately-held low and high acid aseptic contract manufacturer located in Beloit, WI. Built on the "TRU TO NATURE" approach, our mission is to produce food and beverage ingredients that promote life, health and well-being. TRU provides liquid aseptic solutions to the FoodService, C-store, Club Store and Industrial markets. We focus on Bag in Box and Bulk processing and packing of dairy, plant-based, coffees, teas, vegetable and fruit juices. Additionally, TRU offers compounding, unitized packaging and standardization of products with quality variances.
