

# AMYZF RELEASES COMPANY LIB RECYCLING BUSINESS PLAN/PROFORMA ON POTENTIAL REVENUE FROM 3 TPD PLANT - Mar 28, 2018

SURREY, BRITISH COLUMBIA,  
CANADA, March 28, 2018  
/EINPresswire.com/ -- March 28, 2018 -  
Vancouver, BC

Larry W. Reaugh, President and Chief Executive Officer of American Manganese Inc. (“American Manganese” or “AMY” or the “Company”), (TSX.V: AMY; Pink Sheets: AMYZF; Frankfurt: 2AM), is pleased to announce that the Company has posted the Company’s Business Plan (“CBP”) on their website [AmericanManganeseInc.com](http://AmericanManganeseInc.com). The following are the highlights contained in the CBP.

- a) Executive Summary
- b) Business Overview
- c) Strategy
- d) Operating Plan
- e) Financial Plan
- f) Market Analysis and Competition

Kemetco Research Inc.’s ongoing bench scale and IP work is meeting expectations and on completion will allow the company to move forward on design work for a commercial demonstration plant.

“

The demonstration plant would process battery cathode scrap materials at a nominal rate of 3 tonnes/day.”

*Larry Reaugh*

Mr. Reaugh says: “The demonstration plant would process battery cathode scrap materials at a nominal rate of 3 tonnes/day. Management’s engineering and financial analysis indicates a very economically robust project even at this small scale.”

About American Manganese Inc.

American Manganese Inc. is a diversified specialty and critical metal company focused on capitalizing on its patented intellectual property through low cost production or recovery of electrolytic manganese products throughout the world, and recycling of

spent electric vehicle lithium ion rechargeable batteries.

Interest in the Company's patented process has adjusted the focus of American Manganese Inc. toward the examination of applying its patented technology for other purposes and materials. American Manganese Inc. aims to capitalize on its patented technology and proprietary know-how to become an industry leader in the recycling of spent electric vehicle lithium ion batteries having cathode chemistries such as: Lithium-Cobalt, Lithium-Cobalt-Nickel-Manganese, and Lithium-Manganese (Please see the Company's July 27, 2017 press release for further details).
