

NAB 2018 Marks Trade Show Debut For MAAT

Company demonstrates latest products at NAB 2018 courtesy of The Telos Alliance

LAS VEGAS, NV, US, March 29, 2018
[/EINPresswire.com/](http://EINPresswire.com/) -- MAAT

Incorporated, a manufacturer of exceptional performance professional audio solutions, today announced that DRMeter MkII and RSPHaseShifter will be exhibited and demonstrated at the Telos Alliance booth in the upcoming National Association of Broadcasters convention. DRMeter MkII, an audio plug-in for the measurement and monitoring of audio Loudness and dynamics, will accompany RSPHaseShifter, a plug-in for the alignment of multiple versions of a source when mixing.

The latest product from MAAT, DRMeter MkII premieres several new features for the Loudness metering marketplace, and is the first loudness measurement tool specifically designed for music creation as well as broadcast production and post. Combining high accuracy, R128 and A/85 compliance with display of channel-specific trends, the cross-platform Loudness meter presents both relative and absolute scales simultaneously. DRMeter MkII is also the first plug-in to include the emerging PSR metric, Sample Peak-to-Short-term Loudness Ratio, as well as DRi, an established loudness metric designed to gauge the dynamic contrast of popular music.

Also on demo at NAB, the cross-platform RSPHaseShifter quickly creates a high quality, phase shifted version of a monaural or stereo input, and is designed to better combine multiple feeds during live and remote recordings. Providing a fast, convenient means of aligning individual mix elements for best subjective results, RSPHaseShifter also offers a delta mode to preview isolated audio reflecting only the content that has been altered by signal processing. This extends the application to the control of frequency-dependent stereo spread for M/S workflows in broadcast and post-production applications.

On display at The Telos Alliance's TV Solutions Group during NAB 2018, both products are available for all major DAWs (Digital Audio Workstations) in AAX, AU, VST2 and VST3 formats. Visit booth SU2321 April 9th through 12th for a hands-on demonstration during the show to see how MAAT speeds everyday workflow chores. Also visit <http://www.MAAT.digital> on the web for demo downloads, specifications, informational videos and more.

ABOUT MAAT Inc.

MAAT Incorporated is built on the belief that higher accuracy, enhanced workflows and less visual

fatigue are hallmarks of better quality. MAAT is derived from “Mastering Academy Audio Tools,” reflecting the deep connection and empirical wisdom gained from years of practical experience. MAAT’s reliance on hard science and focused research, balanced by in–depth listening, redefines audio tools for professionals worldwide.
