

# Bitcoiin B2G – Decentralized, Deregulated, Anonymous

*Other countries have adopted cryptocurrencies wholeheartedly, and see coins like Bitcoiin B2G as an engine for economic development.*

HONG KONG, CHINA, April 2, 2018 /EINPresswire.com/ -- [Bitcoiin B2G](#) ([www.bitcoiin.com](http://www.bitcoiin.com)), having successfully ending its ICO sale on March 26, 2018, is pleased to announce the full decentralization, deregulation and anonymity of its [cryptocurrency](#), Bitcoiin B2G. Each of these features holds a key to understanding cryptocurrencies, and Bitcoiin B2G in particular.

## Decentralized

Everything about buying, managing and storing any cryptocurrency starts out in your computer. Every cryptocurrency is simply a software application—a very elaborate one, programmed to have a life of its own. While you can convert a blockchain-backed cryptocurrency—including Bitcoiin B2G—into a fiat currency like dollars or euros, the integrity of your ownership interest relies not in some government “fiat,” but in the fact that everybody has equal access to the blockchain.

And decentralized mining of Bitcoiin B2G means that everybody is looking. Every 15 seconds, Bitcoiin B2G’s Ethereum-based algorithm Bitcoiin B2G updates the globally-available blockchain. Nobody controls this process. It is global, transparent, incorruptible and reliable. Globally. Because it is decentralized.

## Deregulated

Governments around the globe have made attempts to regulate cryptocurrencies. Some have said cryptocurrencies are money. The U.S. Internal Revenue Service says utility coins like Bitcoiin B2G are property, not money. In other words, one Bitcoiin B2G might just as well be a piece of jewelry, or a gemstone like diamonds or jade. Or some other valuable tangible thing. The difference is, Bitcoiin B2G exists as a digital artifact, not a metal coin.

Some governments have taken contradictory positions. Some have characterized Bitcoiin B2G as a security. Which clearly it is not, so long as it is tradeable for other cryptocurrencies, fiat currencies, or

Decentralized mining of Bitcoiin B2G means that everybody is looking. Every 15 seconds, Bitcoiin B2G’s Ethereum-based algorithm Bitcoiin B2G updates the globally-available blockchain. Nobody controls this process. It is global, transparent, incorruptible and reliable.

goods and services. Other countries have adopted cryptocurrencies wholeheartedly, and see coins like Bitcoin B2G as an engine for economic development. So far, these countries include Denmark, the United Kingdom, Malta, Singapore, Switzerland and many others.

## Anonymous

Bitcoin B2G accounts are anonymous to the general public. An account holder is required to show bona fides—identification, address, country of domicile—upon account opening. This is termed “Know Your Customer,” and is common to all cryptocurrencies in a world where money-laundering is a reality. Bitcoin B2G supports these protocols wholeheartedly. But your account remains anonymous, existing only in cyberspace.

What lies ahead? Savvy players can still purchase Bitcoin B2G tokens, trade Bitcoin B2G for other cryptocurrencies, or hold their position and wait to see what the price will do on the global market.

A Unique Opportunity: Cryptocurrency enthusiasts, depositors and adventurers have seldom had such a chance to participate in the exhilarating launch of an integrated cryptocurrency ecosystem, with built-in controls and explosive upside growth potential.

Bitcoin B2G announces the second generation of cryptocurrency. Catch the wave.
