

Start Options places big mining-rig order with Dragon Mining

These dedicated mining-rig workstations will be used for mining new B2G tokens, for general release into the peer-to-peer (P2P) utility token ecosystem.

HONG KONG, CHINA, April 4, 2018 /EINPresswire.com/ -- Start Options (<https://startoptions.com>) announces placement of an order for 10,000 B2G/ETH mining-rig computer workstations with [Dragon Mining Technology](#). These mining-rig machines will be used to mine Bitcoin B2G, and serve as the backbone for B2G mining pools.

StartOptions.com is enthusiastic about sharing this big new project with Dragon Mining, a market leader in provision of crypto-mining solutions for emerging cryptocurrencies, including engineering and manufacture of crypto-mining GPU-based rigs dedicated

“We are delighted to receive the order from Start Options,” said Johnny Chen, CEO of Dragon Technology. “We regard this order as recognition of our partnership with Bitcoin2Gen, and our competence in engineering and manufacturing crypto-mining infrastructure in the industry.”

These dedicated mining-rig workstations will be used for mining new B2G tokens, for general release into the peer-to-peer (P2P) utility token ecosystem. These rigs will also verify and post to B2G’s Ethereum-based blockchain ledger.

Mining pools: These pooled configurations bring together mining resources. A group of miners working together increase their chances of finding a validated block, and thus actually posting to the blockchain. This increased opportunity to post a validated block to the blockchain exceeds that of individual mining. Such mining pools, configured in an array or set up as P2P pools, combine individual workstations with pool members, increasing throughput to the blockchain via joint processing power.

About Dragon Mining Technology: Dragon Mining Tech, a world-class cryptocurrency-mining hardware manufacturing company, integrates engineering expertise and manufacturing capacity. The benefit is a massively-parallel mining ecosystem, dedicated to mining Bitcoin2Gen. Established in 2015 and incorporated in 2018, Dragon Mining is headquartered in Shenzhen, China.

StartOptions.com is enthusiastic about sharing this big new project with Dragon Mining, a market leader in provision of crypto-mining solutions for emerging cryptocurrencies, including engineering and manufacture of crypto-mining GPU-based rigs dedicated to Ethereum-based cryptocurrencies, and altcoin applications.
