

TaranHouse: New Big Data Warehouse Announced by Tarantool

Data warehousing allows businesses to create fast analytics from across their data sources. Businesses can grow faster, eliminate data silos, and gain insights.

MOUNTAIN VIEW, CA, UNITED STATES, April 4, 2018

/EINPresswire.com/ -- Tarantool in-memory and disk database announced the launch of a new data warehouse product today, TaranHouse.

TaranHouse is designed to be a faster and more cost-effective data warehouse for any sized business. It breaks down data silos and connects most current data sources, including MySQL, PostgreSQL, IBM DB2, SAP, Oracle, and Microsoft SQL Server. Easy integration with Qlik, Power BI, and Tableau so users can build queries from their favorite BI tools.

“We're happy to announce TaranHouse, our new product for analytics and data warehousing. It has full-fledged support for SQL that is compatible with various popular Business Intelligence (BI) tools. Inside TaranHouse each SQL query is executed in parallel over any size fleet of old or new machines, providing you with lightning-speed data processing. Also TaranHouse easily connects to your existing relational data sources,” Dennis Anikin, General Manager of TaranHouse.

Instead of waiting for answers, business analysis and data science teams can enjoy building analytical queries with their favorite BI tools”

Tyler Norkus

“The goal is to make it simple and affordable for any sized business to realize the benefits of data warehousing. Instead of waiting for answers, business analysis and data science teams can enjoy building analytical queries with their favorite BI tools and get answers to complex queries and joins within seconds,” stated Tyler Norkus, Director of Sales and Marketing.
