

Uptime® Magazine Announces Solution Awards Winners for 2018!

Excellence in innovative products, software, training and services for reliability and asset management.

FORT MYERS, FL, US, April 9, 2018 /EINPresswire.com/ -- [Uptime®](#), a magazine serving over 50,000 reliability leaders and asset management professionals, announced the [Solution Awards](#) winners for 2018. The Solution Awards Program recognizes companies that demonstrate innovation in products, software, training and services for reliability and asset management.

After a public vote and careful consideration from the panel of judges, the 2018 Solution Awards winners are:

Best Overall: Predictive Asset Analytics (AVEVA)

“Transparent decision making (DM) with a clear understanding of risk (RI) is one of the four major themes of successful asset management. AVEVA Predictive Asset Analytics meets organizations where they are and grows with them as they mature their asset management journey.”

“

The RELIABILITY Conference features world-class exhibitors that provide innovative solutions to the toughest challenges faced by organizations around the world.”

Terrence O’Hanlon

Reliability Engineering for Maintenance: OnePM (ARMS Reliability)

“Most organizations still manage reliability strategy in a spreadsheet that begins to age as soon as it’s complete. The OnePM platform fills the missing space of reliability strategy management dynamically connected to the work management system (EAM/CMMS). Reliability strategy is dynamic, and this is the first management platform that supports this concept.”

Asset Condition Management: VIBSCANNER 2 (PRUFTECHNIK)

“Vibration data quality is critical for successful asset condition management, and the new VIBSCANNER 2 speeds the data collection process significantly. This allows vibration data analysts to spend time making decisions that advance reliability rather than waiting for data collection.”

Work Execution Management: eMaint CMMS (Fluke Corp.)

“Rapid implementation, outstanding customer support, field access, mobility and decision support dashboards for a low monthly fee are changing the nature of the traditional, expensive, premise client-

server based CMMS/EAM system of yesterday."

Leadership for Reliability: Operational Certainty Consulting (Emerson)
"Emerson is now offering a much-needed 360 degree technical and cultural support program for organizations seeking 'top quartile' performance and a laser-focus on achieving organizational business objectives."

Asset Management: AssetWise CONNECT Edition (Bentley Systems)

"Managing assets across the entire lifecycle, embedded machine learning and analytics, creating a connected data environment for information technology (IT), operational technology (OT) and engineering technology (ET) with deep domain knowledge for asset reliability make this platform a great choice for asset knowledge and asset lifecycle management."

Winners will be honored in a special awards ceremony at [The RELIABILITY® Conference](#) (TRC-2018), hosted by Reliabilityweb.com®, scheduled April 23-27, 2018 at the South Point Hotel in Las Vegas, Nevada. This year's ceremony will be held on Wednesday, April 25th, as the opening event at the conference gala dinner.

"The RELIABILITY Conference features world-class exhibitors that provide innovative solutions to the toughest challenges faced by organizations around the world," said Terrence O'Hanlon, CEO and Publisher of Reliabilityweb.com and Uptime. "Asset managers and reliability leaders attend each year to ensure that they bring new ideas for improving asset performance while driving wasted cost out of the system."

To learn more about Uptime magazine's Solution Awards winners, please visit the TRC-2018 web site: www.reliabilityconference.com.

Since 2015, Uptime magazine has honored award-winning, innovative products, training and services for maintenance, reliability and asset management. What began as a simple way to acknowledge innovation has evolved into a valuable resource for the latest development in asset performance management. Sixty-five percent of attendees report implementing a solution that they discovered at The RELIABILITY Conference expo.

Nominations for the 2019 Solution Awards may be submitted beginning January 2019. Visit www.reliabilityconference.com for more information.

About Uptime® Magazine

Uptime, a leading magazine for over 50,000 reliability leaders and asset management professionals, has been in publication since 2005. Uptime is published by Reliabilityweb.com and is a bi-monthly publication that is available in both print and digital editions. Subscriptions are by request and free to qualified reliability professionals at www.uptimemagazine.com.
