

# MxHero Enabling GDPR, Email Security With Leading Cloud Storage Sees Strong Growth In Accounting Firms

*Accounting firms emerging as a strong industry for MxHero's Mail2Cloud technology that connects email to leading cloud storage security & collaboration*

SAN FRANCISCO, CA, UNITED STATES, April 10, 2018 /EINPresswire.com/ -- [MxHero](#), a company focused on the integration of email and leading cloud storage services, such as, [Box](#), Egnyte, Google Drive and OneDrive, has seen rapid growth in clients from the accounting industry. Accounting firms are looking to resolve challenges of managing and securing email correspondence with clients. MxHero, leverages the collaboration and security benefits of leading cloud storage services and extends them to email content. Mail2Cloud customers are able to easily save client messages & attachments to client specific folders and securely share these messages with internal and external parties without resorting to insecure email.

“mxHero's technology and support allowed our virtual accounting and tax firm to sync our Box document storage system to our email. Now our client data can flow from our clients to Box where we can seamlessly and securely share links with important tax information to our clients easily from our email. Our team of tax experts and clients all over the world would not have the same great experience and efficiencies without mxHero's technology,” says Tim Cofrin, Tax Specialist, [HPC Technology Group, LLC](#)

“

GDPR and email security are key challenges for accounting firms. Leading cloud content platforms go a long way to resolving these concerns but leave email exposed. MxHero closes that gap.”

*Alex Panagides, CEO,  
mxHero Inc.*

MxHero allows accounting firms to meet strict GDPR and other security regulations by automatically securing email communications based on message or attachment content. The Mail2Cloud platform can identify personal information, such as social security numbers, payroll files or other sensitive content in sent emails and automatically replace with secure cloud storage links. The technology requires nothing of the end user, allowing employees to send and receive emails from any device without change. Securing of email content is done via centrally configured rules and in the background prior to e-mail delivery.

“We're excited to see the adoption of Mail2Cloud by

accounting firms. Accounting is a high value professional service that relies heavily on email and its attachments as a core part of the workflow. MxHero shines in this context by empowering these workflows with modern content storage security and management technologies,” says Alex Panagides, CEO, mxHero Inc.

#### About MxHero

MxHero's products and services gives companies, service providers and end users powerful new ways to control, use and analyze email-based content. Apps developed for MxHero's platform work with any email management program, including Gmail, O365 and Microsoft Exchange.
