

Louisiana Mesothelioma Compensation Center Now Urges a Public Utility-Energy Worker with Mesothelioma in Louisiana to Call for Instant Access to the Nation's Top for Lawyers for Compensation Results

NEW YORK , NEW YORK , USA, April 27, 2018 /EINPresswire.com/ -- The Louisiana Mesothelioma Compensation Center's number one goal is to see to it that a person with mesothelioma in Louisiana receives the very best possible financial compensation settlement. The group is especially focused on assisting public utility or energy workers with this rare cancer caused by asbestos exposure. From a potential financial compensation standpoint, a public utility or energy worker with mesothelioma in Louisiana could potentially be looking at a compensation settlement of a million dollars or more if they have some of the nation's top lawyers assisting them as the group would like to discuss anytime at 800-714-0303.

<http://Louisiana.MesotheliomaVictimsCenter.Com>

According to the group, "A public utility or energy worker with mesothelioma in Louisiana or their family members will need to focus in on retaining the services of specialist mesothelioma attorneys if they expect or hope to receive the very best possible financial compensation settlement results. They will also need to hire a lawyer who has a demonstrated history of going above and beyond the call of duty for their clients when it comes to a mesothelioma compensation settlement as we would like to explain at 800-714-0303."

“

Public utility district or energy workers in Louisiana can literally have similar levels of asbestos exposure to that of a US Navy Veteran or a shipyard worker.”

Louisiana Mesothelioma Victims Center

When the Louisiana Mesothelioma Victims Center mentions public utility or energy workers they are referring to

- * Electrical services providers including power plants/power house
- * Water districts such as Sewage and Water Board worker in New Orleans
- * A natural gas provider worker for residential or commercial

users throughout Louisiana

- * An oil refinery worker anywhere in Louisiana
- * A chemical plant worker anywhere in Louisiana
- * An offshore oil rig worker anywhere in Louisiana

The Louisiana Mesothelioma Victims Center says, "Public utility district or energy workers in Louisiana can literally have similar levels of asbestos exposure to that of a US Navy Veteran or a shipyard worker. Unfortunately, you rarely hear about public utility workers with mesothelioma much like you're not very likely to know about construction workers with mesothelioma who built electrical substations, sewage treatment facilities, or laid pipe for a natural gas provider during the 1960s, 1970s, and or 1980s. Before a person with mesothelioma in Louisiana hires a lawyer or law firm we are urging them to call us at 800-714-0303. We are advocates for people with mesothelioma not a law firm."

<http://Louisiana.MesotheliomaVictimsCenter.Com>

The Louisiana Mesothelioma Victims Center wants to emphasize there is a statewide initiative available to a diagnosed victim anywhere in Louisiana including communities such as New Orleans, Baton Rouge, Shreveport, Lafayette, Lake Charles, Kenner, Bossier City, Monroe.

When it comes to treatment options for mesothelioma in Louisiana the Louisiana Mesothelioma Victims Center strongly encourages diagnosed victims to contact the following cancer treatment centers in Louisiana, and in Texas. Note: The MD Anderson Cancer Center in Houston, Texas may be one of the most capable mesothelioma treatment centers in the world: Oshner Cancer Institute New Orleans; <http://www.louisianacancercenter.org/research/partners/ochsner/>, The MD Anderson Cancer Center Houston, Texas: <https://www.mdanderson.org/>

High-risk work groups for exposure to asbestos in Louisiana include Veterans of the US Navy, power plant workers, shipyard workers, oil refinery workers, chemical plant workers, public utility workers, factory workers, plumbers, electricians, insulators, auto mechanics, machinists, and construction workers. Typically, the exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's. <http://Louisiana.MesotheliomaVictimsCenter.Com>

The states indicated with the highest incidence of mesothelioma include Maine, Massachusetts, Connecticut, Maryland, New Jersey, Pennsylvania, Ohio, West Virginia, Virginia, Michigan, Illinois, Minnesota, Louisiana, Washington, and Oregon. Six of these states are home to US Navy bases or navy shipyards. It is unlikely a US Navy Veteran was exposed to asbestos in Louisiana while serving in the navy.

For more information about mesothelioma please refer to the National Institutes of Health's web site related to this rare form of cancer: <https://www.cancer.gov/types/mesothelioma>.
