Carbon Black, Tom Kellermann, Chief Cybersecurity Officer
www.securitysolutionswatch.com/Interviews/in_Boardroom_CarbonBlack_Kellermann.html
"Existing cybersecurity architectures are failing due to two macro trend cloud computing and mobility. The endpoint is inadequately secured and the adversary often has a footprint within one's perimeter defenses. We must pursue a strategy of intrusion suppression wherein we can decrease dwell time and this detect, deceive, divert and hunt and adversary unbeknownst to the adversary. To achieve this an organization must: employ application whitelisting, employ an endpoint protection platform, establish a Hunt Team and roll out deception grids."

Cyberinc, Samir Shah, CEO

Extenua, Steve Visconti, President & CEO

www.securitysolutionswatch.com/Interviews/in Boardroom Extenua Visconti.html

Extenua CEO, Steve Visconti, Comments On Ransomware Attack In Atlanta and Blockchain...
...Will Blockchain Be Blocked In 112 Countries?

“

We are honored to have these outstanding security experts join us "In The Boardroom" to discuss today's threats and, most importantly, state-of-the-art, cutting-edge, proven solutions. ”

Martin Eli, Publisher

data" it contained and discovered a vast trove of data which is irrevocably tainted with unremovable links to illegal child pornography. This discovery hypothetically makes Bitcoin ownership illegal in almost every country that has laws against the possession and distribution of images of child abuse, 112 countries, as this tainted content inevitably is distributed among and by all users of the currency. What's the solution?

“First, let's recognize that blockchain, and all online transactions, are only as strong as its weakest link - the endpoint. Yes, where humans meet machine. There are several known vulnerabilities including obtaining personal PKI key, integration of blockchain into applications, fraud by groups of participants, scale has not been tested or peer reviewed. When used for crypto-currency such as Bitcoin, the problem extends to the digital wallets. The digital wallets are vulnerable to ransomware just like any

**Isolate Malware,
Keep your organizations
protected and protective**

www.Cyberinc.com

Extenua CEO, Steve Visconti, told us, “The recent ransomware attack on the city of Atlanta (<https://www.cnn.com/2018/03/22/us/atlanta-ransomware-attack/index.html>) is an ominous development. 2018 looks like it is, unfortunately, going to be THE year of ransomware.”

“The blockchain world is also coming to grips with a shocking revelation that could potentially threaten the very existence of the world's foremost cryptocurrency Bitcoin. Researchers from Germany's RWTH Aachen University analyzed (<https://www.sciencealert.com/bitcoin-illegal-almost-everywhere-after-shocking-blockchain-discovery-child-pornography>) the blockchain to examine how much "arbitrary

other file on your device. We have seen countless ransomware attacks that locked up the end-users wallet. “

Cloud2Drive configured with our SilverShield product can protect against ransomware and here is how:

Configure Cloud2Drive with our SilverShield SFTP product in any and all servers and desktops that are critical (we will show you how to configure these machines). All files using Cloud2Drive, including the hard drive if configured properly are transported to virtual drive to the cloud via SilverShield SFTP using SSH protocol. SSH and SFTP are impervious to ransomware. There are no known ways to attack or insert ransomware. This does not mean the enterprise will not get attacked, it means that if they are attacked AND if the user clicks on the link or opens an infected file, ALL data can be restored from backup images without paying the ransomware! You simply restore the infected servers and machines to the last known point prior to the attack.

See:

<https://www.extenua.com/news/cloud2drive-and-silvershield-impervious-to-ransomware>

Cloud2Drive provides a commonsense approach to securing your data. Our highly encrypted and obfuscation design removes the common attack surfaces.

Cloud2Drive never stores encryption keys anywhere. If no key exist then it can't be stolen. Our unique patented approach to key generation in real-time only for the instance to encrypt and decrypt provides a true secure dynamic stateless key system. Couple this with SilverShield SFTP and SSH for backup, you now have a system which is impervious to ransomware and malware."

Mr. Visconti added, "Extenua's customers include Fortune 500 companies IBM, Fujitsu, Boeing, Nokia, Sony, Toyota, Kaiser Permanente, US Bank and Motorola as well as government institutions, security agencies, and thousands of small and mid-size businesses."

Extenua - World's Most Advanced Methods of Cyber-security Software for a Hostile World.

IMAGEWARE[®] SYSTEMS

ImageWare Systems - WWW.IWSINC.COM

ImageWare® Provides Sales Update of GoVerifyID® Biometric Authentication Technology
ImageWare® Systems, Inc. (IWSY), a leader in mobile and cloud-based, multi-modal biometric identity management solutions, provides its first sales update for 2018.

Jim Miller, Chairman and CEO of ImageWare, said that “We have sold additional licenses to an existing customer who is expanding the use of the IWS Biometric Engine and three of our partners have made initial sales of GoVerify ID® (GVID). We continue to expect that many initial sales will often be made for enterprise/employee users and then adding users as services are rolled out to their customers.

“Working with our partners, combined with anticipated sales from our own sales efforts, we now expect additional sales on a regular basis and look forward to the next sales update in May,” concluded Miller.

Federal Government Customer

- An existing Federal government customer, who has been using the patented IWS Biometric Engine for biometric authentication for more than five years, has made a \$730,000 purchase of additional licenses.

Partner Sales

- An ImageWare partner has made a sale to a privately held global corporation which has placed an initial order for enterprise GVID to serve the first 1,000 employees with plans to roll out GVID to its remaining 55,000 employees throughout the year.
- Another ImageWare partner has made a sale of its new cloud-based product with GVID built-in to two federal government agencies for use by select employees.
- Fujitsu has purchased licenses for 1,000 of its employees.
- For all four of these partner sales, ImageWare generates revenue on a per user/per month basis.

ImageWare's GoVerifyID technology provides turnkey solutions to secure enterprise systems from security infrastructure providers such as Fujitsu, Microsoft, IBM, CA, HPE and other vendors. GVID is flexible to support nearly any use case and business process for your employees, partners, and customers. GVID enables organizations and users to select the biometrics of their choice including face, voice, fingerprint, palm image, and palm vein to provide increased security and convenience. It deploys quickly either on premises, and with multiple public, private and hybrid cloud hosting options including Fujitsu Cloud Service K5®, and AWS (Amazon Web Services).

Cyber Investing Summit, Tuesday, May 15th, 2018 in New York City.
www.cyberinvestingsummit.com

Now in its third year, the Cyber Investing Summit is an all-day conference exploring the investment opportunities available in the rapidly growing cybersecurity sector. The Summit differs from traditional product centered conferences by focusing primarily on the financial side of the cybersecurity industry. The Cyber Investing Summit will take place Tuesday, May 15th in New York City. Our last two conferences were held at the New York Stock Exchange. Due to popular demand, we have outgrown the space and are moving to Convene, a premium venue in New York's Financial District.

TRANSPORT SECURITY & SAFETY EXPO, Washington, DC, June 11-12, 2018
www.transportsecurityworld.com/events/tssx/venue

Geo IoT World 2018
www.geoiotworld.com

Where Geolocation Powers IoT Innovation
Conference, Workshop, Exhibition – June 11-13, 2018 – Brussels, Belgium.
Geo IoT World is the only event dedicated to the location-aware technologies for boosting IoT opportunities. Over 3 days, 70+ speakers will share their expertise and experience of High-Precision GNSS, Beacons, Computer Vision, SLAM, UWB, LPWAN, 5G, NB-IoT, Big Data, etc. to empower IoT applications in multiple Verticals such as Retail, Automotive, Industry or Healthcare. This third edition will also feature a full-day Bluetooth Beacon Masterclass while 30 exhibitors will further highlight the power of where for the IoT. Geo IoT World 2018 will welcome 300+ attendees representing IoT, geolocation and analytics industries along with implementers in multiple Verticals.

Intelligence-Sec are pleased to announce that our 3rd annual Defence Satellites conference and exhibition will take place in Paris, France at Eutelsat's Headquarters on the 6th and 7th June 2018. To be part of our international Defence Satellites event either as a speaker, sponsor/exhibitor or delegate please email us on events@intelligence-sec.com or call us on +44 (0)1582 346 706

Military Exports & Compliance Europe is taking place in Brussels, Belgium
on the 12th – 13th June 2018

and will provide you unrivalled access to senior EU officials who deal with export controls, compliance and regulations. To be part of our event either as a speaker, sponsor or delegate please contact us at events@intelligence-sec.com or +44 (0)1582 346 706.

2nd Blockchain for Finance Conference, APAC
June 20-21, Singapore

<https://blockchainapac.fintecnet.com>

SDW 2018 - 25-27 June, 2018 - QEII Centre, London, UK

www.sdwexpo.com

SDW is a world-leading conference and exhibition event providing a global showcase for next-generation human identity solutions, focusing on intrinsic document security and on the new cutting-edge secure infrastructure now required to produce and use these advanced documents in live situations.

In-depth SDW Conference – 25-27 June 2018

Recognised worldwide as the pre-eminent conference for professionals involved in secure ID credentials and government-identity solutions, the three-day SDW conference brings you innovations, insight, analysis and debate direct from 75+ industry experts. The SDW conference programme covers key issues, including identity fraud, document design, travel documents, smart borders, eID, biometrics, digital and mobile ID, smart citizens and the future of identity innovations.

Free SDW Exhibition – 26-27 June 2018

The SDW Exhibition is a global showcase for the latest secure document and identity innovations and features more than 140 leading exhibitors. Visitor entry is free and includes access to our series of seminars in the Knowledge Theatre.

Connect Security World

Embedding Trust in IoT Systems and Connected Hardware

Conference & Exhibition - Sept. 25-27, 2017– Marseille Provence, France
