

Global Augmented and Virtual Reality in Healthcare Market to grow at a CAGR of +35% during forecast period 2017-2022

Global Augmented and Virtual Reality in Healthcare Market 2022 Overview and Analysis

PUNE, MAHARASHTRA, INDIA, April 10, 2018 /EINPresswire.com/ -- This market intelligence report is a comprehensive analysis of the situation of [Augmented and Virtual Reality in Healthcare market](#). A detailed investigation of the past progress, present market scenario, and future prospects has been offered in the report. It also gives accurate data of the main strategies, market share, and products of the leading companies in this market sector.

The market is majorly driven by applications in surgical simulations, diagnostic imaging, patient care management, rehabilitation, and health management. The application of Augmented and Virtual Reality in training medical professionals provides them enhanced understanding of anatomy & physiology and assists in complicated surgeries that require precision, thus, resulting in reduced complications and lesser trauma. Virtual Reality helps patients get over their worst fears and phobias through the exposure therapy. These technologies are also gaining significance in fitness management due to the development of various health apps that help train doctors as well as patients.

Major use cases of Augmented and Virtual Reality head-mounted displays in healthcare include pre-hospital medical care, nursing care in clinical environments, and medical treatment in hospitals. HMDs with respect to out-of-hospital-care and emergency medical services can be used to help casualties in mass accidents and disaster medicine..

Key players:

Google (US), Microsoft (US), DAQRI (US), Psious (Spain), Mindmaze (Switzerland), Firsthand Technology (US), Medical Realities (UK), Atheer (US), Augmedix (US), Oculus VR (US)

Key segmentations and sub segmentations are elaborated with right information for Augmented and Virtual Reality in Healthcare market. The popularity and anticipated opportunities for all the segmentations are well explained in order to give a clear idea about the market trends. On the basis of estimations of the key segmentations, Augmented and Virtual Reality in Healthcare market has been elucidated. Technological developments which have taken place during the ongoing market situation and the predicted scenario during the forecast period are presented systematically. The future potentials of this market are analyzed and the prevalent trends are been looked upon with utmost detailing. The growth in all the major geographic regions are been studied in detail in this particular report. With exact data on the top most regions for this market and the reason they hold that position is studied and elaborated.

Moving forward, a competitive landscape of Augmented and Virtual Reality in Healthcare market is presented for understanding the market importance. This section gives the prime strategies, weaknesses and strengths and the major contributed of the growth have been highlighted. Gross, revenues, product overview, contact information and many such points are explained for Augmented and Virtual Reality in Healthcare market in depth.
