

# Rose Cruz Celebrates Success of Plasma Pen Pro (PPP) Training in Energizing Beauty Industry Careers

*Men and Women long for a way to look more youthful and to fight skin blemishes. Plasma Pen Pro Training delivers a way for professionals to meet these needs.*

TORONTO, ONTARIO, CANADA, April 13, 2018 /EINPresswire.com/ -- In the beauty world, one of the very hot topics of discussion is plasma skin tightening, a safe and non-invasive way to appear more youthful and vibrant, while also helping to clear up things like acne and other unwanted facial issues. Toronto-based Rose Cruz is leading the way in helping professionals be able to offer plasma pen services with her very highly regarded [Plasma Pen Pro](#) Training and Certification Program, which provides classes both in Toronto and across the world. Recently Cruz celebrated how adding plasma pen treatments after receiving PPP certification has brought in new, impressive streams of income to a long list of spas, medical offices, and solely focused Plasma Treatment centers.

"For someone who wants to be as successful as possible providing beauty, health, and wellness services, staying at the cutting edge of technology can make all the difference in the world," commented Cruz, who is well known for giving plasma pen treatments to Hollywood A-list clients. "My team and I have over 35 years combined experience in this and related fields and we get the good news every day about how training and certification changes lives."

After receiving plasma pen fibroblast training and certification the graduate of the program will be able to treat a wide range of skin conditions effectively and safely, including fine lines, smokers' lines, crow's feet, neck lines, eyebrow ptosis, nasal labial folds, moles, skin tags, and much more.

The plasma fibroblast treatments use an electrical charge, which creates a controlled burn that causes the body's own natural reaction to tighten, plump, and heal the skin. The treatments are both non-surgical, and non-invasive.

The Plasma Pen Pro (PPP) Training and Certification program by Rose Cruz covers all basis of skin,

skin care, and a variety of plasma treatments. Rose Cruz believes that if you are going to take a course in skin tightening using the PPP technique, then the student must be able to practice on a variety of skin conditions, such as: wrinkles, warts, moles, skin tags, loose skin, eyebrow lift, eyelid lift, fine lines, etc. By being able to practice on a variety skin conditions, the PPP student is able to leave the course with a lot of confidence, and all of our students have gone on to become successful PPP techs in their own community.

The Plasma Pen Pro program consists of Skin Anatomy, Plasma Theory, Practice on Non-Human skin, and Practicing on Live Models. Unlike other programs that try to fill their classes with as many students as possible, Rose Cruz believes that a small class size yields better PPP techs because more attention can be paid to each student individually, and more practice time means more exposure and experience for our PPP students.

The cost of the course is \$4000 CAD, and this includes all equipment, supplies, PPP machine, PPP probes, numbing creams, PPP manual and Live training. All live models are provided by Plasma Pen Pro. After the PPP student has successfully completed the PPP program, they will receive a Certificate of Completion and are able to start their PPP business on their own or add this treatment to their existing menu of services.

Anyone can take this course; however, PPP suggests that you contact your current or local insurance company to ensure that you are able to obtain coverage for conducting plasma treatments, or if you need any more certifications.

Upcoming PPP Training and Certification Course Dates:  
May 6-8, 2018 - Toronto, Ontario  
June 10-12, 2018 - Toronto, Ontario
