

According to New Research, Payment Gateways Market Projected to Grow at CAGR of +25% by 2022

The report takes a close and analytical look at the various companies that strive for a higher share of the global Payment Gateways market.

PUNE, MAHARASTRA, INDIA, April 11, 2018 /EINPresswire.com/ -- [Payment gateways](#) enable transactions in offline, real-time, and hybrid (a combination of offline and real-time modes) modes.

They accept different payment methods such as e-commerce transactions, contactless card transactions, and mobile-based near field communication (NFC) transactions. However, security related concerns may obstruct the climb of the market in several regions. In online payment consumers and enterprises need to share their card and banking details to online payment gateway companies to process their transactions. While sharing these credentials, there are some security related issues being witnessed – for instance, the mass cyber theft that occurred in the central bank of Bangladesh. This may restrict the usage of online payment gateways.
