

Bitcoiin B2G Wallet Now Operational

Bitcoiin B2G has already proven itself to be a success, and an exciting opportunity for the cryptocurrency community.

HONG KONG, CHINA, April 11, 2018 /EINPresswire.com/ -- [Bitcoiin B2G](#) (www.bitcoiin.com) is pleased to announce its companion wallet utility, B2G Wallet (<https://wallet.bitcoiin.com/>), is now fully operational. This milestone, combined with the fully-operational status of Bitcoiin.com and [trading platform](#) Thorex.net (www.thorex.net), signifies the start of a new wave of cryptocurrency capability.

Three-Node Design: The Bitcoiin B2G ecosystem was always designed to have three functioning nodes:

- Bitcoiin B2G—the home site for buying Bitcoiin B2G;
- Thorex.net—the trading platform for instant transfers to and from B2G, original bitcoiin, ETH, USD, Euros and GBP; and
- B2G Wallet—a safe, secure [cryptocurrency wallet](#), accessible worldwide, in which to store users' accumulated assets, including their B2G holdings.

Interoperability, Flexibility, Speed: The original design of Bitcoiin B2G's three-part ecosystem was intended to address a failing of the original bitcoin—i.e., slow transaction processing. While 10-minute update cycles were state-of-the-art in 2008, the development of Ethereum's blockchain algorithm has allowed implementation at 10- to 15-second transaction posting speeds. After a highly-successful ICO sale, Bitcoiin B2G hit the global market as a cryptocurrency, both for storing value and for transacting peer-to-peer business, in late March 2018.

Bitcoiin B2G has already proven itself to be a success, and an exciting opportunity for the cryptocurrency community.

Thorex.net's fully-operational new on-boarding process, focusing on cryptocurrencies, Thorex.net provides easy account set-up, efficient trading and a secure link to the Bitcoiin B2G crypto ecosystem.

B2G Wallet, the third leg of the system, has now added a two-factor authentication security system, user-chosen passwords, a new easy-to-use user interface, and unquestioned secure storage for user cryptocurrency holdings.

B2G Wallet, the third leg of the system, has now added a two-factor authentication security system, user-chosen passwords, a new easy-to-use user interface, and unquestioned secure storage for user cryptocurrency holdings.

A Global Solution: Bitcoin, B2G Wallet, and Thorex.net provide a comprehensive cryptocurrency solution. Global autonomy, anonymity and security, allowing investors, buyers, sellers and traders across the globe a fully-functional cryptocurrency ecosystem. These three nodes are optimized to work together, and are backed up by a mining operation designed and built by Dragon Mining Technology.

A Unique Opportunity: Cryptocurrency enthusiasts, depositors and adventurers find opportunity in buying, selling and trade Bitcoin B2G cryptocurrencies on B2G Wallet. With this roll-out, the B2G ecosystem assumes its place in cryptocurrency's second generation. Catch the wave.

To sign up, convert tokens to Bitcoin B2G, wallet-store and trade: www.bitcoin.com .
