reach their desired audience in a cost-effective manner. This multi-faceted "Smart Contract" is also a source of job creation and provides organic nutrition for the children of New Hope Orphanage. While many of the Top 1% have already profited from the blockchain technology, it appears the Bottom Billion may ultimately benefit the most. According to World Bank data, as much as 70% of the global population has no access to modern financial markets. This is rapidly changing and so are the economic conditions in many third world countries. With access to world capital markets, small businesses and entrepreneurs will be able to compete directly with the US and other developed countries for the first time in history.

Owners of the CT Global Token (CTG) have the flexibility to move their Tokens offline for safekeeping via a Hardware Wallet such as the Nano-S. They may also purchase multimedia advertising on the CT Global Media Network at 50% off the list price. In addition, 25% of all advertising purchased with the CT Global Token (CTG), will be used to fund C-TAP, the Christian Traders Agricultural Project in Kampala Uganda East Africa. C-TAP benefits Aggie's Babby Home as well as New Hope Orphanage and surrounding villages.
