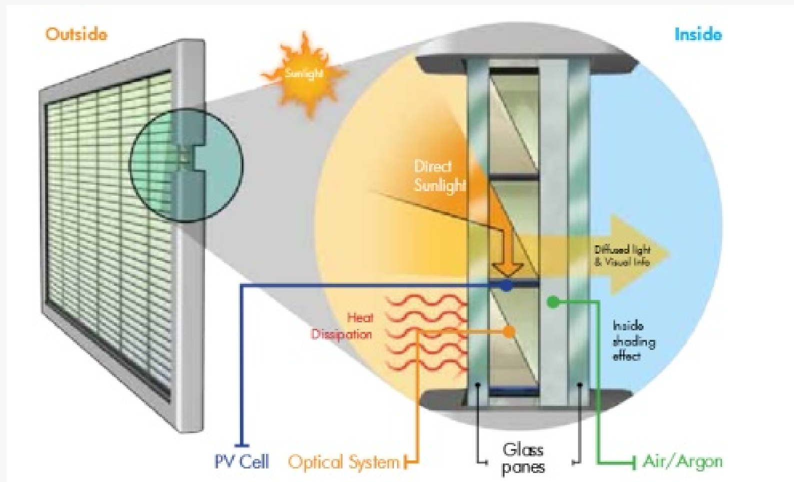
EIN PRESSWIRE

Research details developments in Building Integrated Photovoltaic market report for 2018

Some data on the key technological concepts in the market such as Building Integrated Photovoltaic is presented in the ensuing part of the study



BIPV

PUNE, MAHARASHTRA, INDIA, April 12, 2018 /EINPresswire.com/ -- “Global Building Integrated Photovoltaic Market Size, Industry Drifts, Trades, Supply, Demand, Analysis, and Forecast 2018-2026”. The report on the market offers complete insights into the key development drivers, notable challenges, prominent trends, current technological advancements, and the competitive landscape. The study presents a critical assessment of the scope of key applications and the innovations in products brought about by key players. It further takes a closer look at prevailing regulatory landscape in major regions and identifies promising avenues.

BIPV is a photovoltaic technology that is integrated in the building structures primarily during construction. It is fairly less detrimental to the environment and generates electricity at lower cost than conventional power generating plants. BIPV integration curtails the overall construction cost by a substantial amount. Integration of BIPV products commonly includes rooftop, curtain wall and BIPV window. Zero energy building policy, strictly practiced in the U.S. and European countries, has been achieved effectively through the assistance of BIPV products. These BIPV have seen a great amount of growth in recent years in various construction activities.

Top Key Vendors:
First Solar, Sharp, Yingli Solar, Solar Frontier, SunPower, Solarcentury, Hanwha Solar, REC Group, Panasonic, Kyocera, Canadian Solar, Suntech, Trina Solar, Meyer Burger, AGC Solar, Harsha Abakus Solar, Sapa Group, Wurth Solar, Chengdu Xushuang, Changzhou NESL

BIPV market is segmented based on end-user applications such as commercial, residential and industrial. New norms and regulations regarding the use of renewable energy and subsidies over solar energy are together driving the growth of commercial end-use segment for BIPV market. Laws such as Renewable Energy Law 2006 in China are driving the growth of renewable energy in commercial sector. Hence, commercial segment is anticipated to maintain the highest share to the BIPV end-user market by annual installations in 2019. Growing Asian population and initiatives by governments are creating new opportunities for BIPV in residential sector. However, industrial end-use is expected to grow at slower rate as compare to others.

More light has been shed upon the global Building Integrated Photovoltaic market by the manufacturer with the type of product, distribution channels, and manufacturing base at the top of the priority list. The report has moreover explicated the competitive conditions and patterns prevailing in the market. In such way, methodologies, for instance, expansion, mergers, procurement, and market concentration rate have been examined. For a more insightful examination of key players functioning in the market, the manufacturers have divided the share of the overall industry of best three and five manufacturers.

Table Of Content:

Chapter 1 Building Integrated Photovoltaic Market Overview

Chapter 2 Global Economic Impact on Industry

Chapter 3 Global Market Competition by Manufacturers

Chapter 4 Global Production, Revenue (Value) by Region

Chapter 5 Global Supply (Production), Consumption, Export, Import by Regions

Chapter 6 Global Production, Revenue (Value), Price Trend by Type

Chapter 7 Global Market Analysis by Application

Chapter 8 Manufacturing Cost Analysis

Chapter 9 Industrial Chain, Sourcing Strategy and Downstream Buyers

Chapter 10 Marketing Strategy Analysis, Distributors/Traders

Chapter 11 Market Effect Factors Analysis
