

Optos Daytona Digital Retinal Scanner Changes How Optometrists Treat Their Patients

Cataract and Glaucoma patients will benefit tremendously from the Optos Daytona Scanner, as the laser will not interfere or become affected by the lens' opacity

SINGAPORE, SINGAPORE,
SINGAPORE, April 13, 2018

/EINPresswire.com/ -- [Optos Daytona](#) Digital Retinal Scanner is the optometrist's new weapon in the fight to keep eyesight healthy. This technology enables optometrists to diagnose patients better and come up with a good treatment plan.

The [Optos Daytona Digital Retinal Scanner](#) will do a thorough scan of the retina to reveal any ophthalmologic and general health problems that could lead to potential retina abnormalities affecting a person's vision. For example, a person with Diabetes Mellitus could experience eyesight problems.

This innovative digital machine includes an ultra-wide field scanning laser ophthalmoscope that allows doctors to perform a comprehensive retinal scan without the need to dilate the eyes using eye drops or pupilar dilation. With this technology, doctors can find injuries that are invisible to the human eye. It's ultra-high resolution images highlight possible areas of concern, enabling optometrists to check them with even better precision.

Optos Daytona is the first optometrist instrument that can take a scan of the retina using double laser rays (green and red laser) that enter the eyes through 2mm pupils and reach the retina to take high-quality images that the doctor can read moments later.

Cataract and Glaucoma patients will benefit tremendously from the Optos Daytona Digital Retinal Scanner, as the laser will not interfere or become affected by the lens' opacity.

Conventional instruments don't provide the kind of advantage the Digital Retinal Scanner can offer. Retinal abnormalities can be detected quickly and much earlier, ensuring patients are treated rapidly for any eye and general health complications.

The cost of the Optos Daytona Digital Retinal Scanner is \$29,550. While this is a huge investment to make, experts have concluded that the benefits outweigh the cost.
