

K2 Energy Solutions, Inc. Charges up Internationally with Exhibition at The Battery Show in Hannover Germany May 15-17

HENDERSON, NV, USA, April 13, 2018 /EINPresswire.com/ -- Cell, Battery and Systems Innovator, K2 Energy, will be exhibiting and networking with over 300 other energy storage providers at The Battery Show in Hannover Germany. The Battery Show is Europe's largest trade fair for advanced battery technology, systems, materials, components, and recycling. K2 is actively involved in all aspects of battery solutions, from application specific cell chemistry to large scale energy storage system implementation, and looks forward to the coming opportunity to share their enthusiasm on all things battery related.

“Europe is powering up their energy storage needs and K2 is going to be there to meet this demand. We want to create a positive, innovative experience with our partners and customers.”

explains Sean Campbell, K2's President

and CEO. “We will be showcasing all of our newest product offerings while networking with industry experts discussing our upcoming projects from our newly released U1 Battery line, Starter Battery, and details on our new High Capacity Power Cells and UPS2U Rack Systems.” Campbell states.

“

Europe is powering up their energy storage needs and K2 is going to be there to meet this demand. We want to create a positive, innovative experience with our partners and customers.”

Sean Campbell

The Battery Show exhibition will be a window into K2's aggressive growth and growing global footprint. Combined with K2's newly completed projects and energy storage designs, this will certainly be a worthwhile event.

Knowledgeable K2 Energy representatives will be available to demonstrate and discuss solutions for energy storage needs and details on the new and exciting features now available.

K2 Energy was founded in the growing technology hub of Henderson, [Nevada in 2006](#), and is a leading developer and producer of Lithium Iron Phosphate batteries, which are used in many advanced medical, industrial, and military

applications as well as powering a variety of electric vehicles. K2 produces both energy-optimized

and power-optimized products, which have a multitude of consumer, product, safety, and environmental benefits compared to traditional lead acid batteries.

K2 Energy not only provides cutting edge technology in the Lithium ion energy storage market, but has a world class team of scientists and engineers with extensive knowledge and experience in all aspects of energy storage design, systems integration, manufacturing, support testing and quality control. K2 offers inception to implementation (turnkey) solutions for our customers. Our knowledge base encompasses from the cell to the pack and system level while being able to optimize battery solutions to achieve customer [goals](#)
